

Eastern College Athletic Conference 2007 Football Officiating Manual Six Man Mechanics

This manual was developed under the direction of the ECAC Supervisor of Football Officials and will be used by all officials assigned games by the ECAC at the Division III (ACFC, Empire 8, Liberty, NESCAC, NEFC) level. The mechanics in this manual will also be used in emergency situations in Division I (MAAC), Division II (Northeast 10) games.

Document prepared by Dennis Redding. The ECAC would like to thank Dr. Jerry Faust for his extraordinary help in editing and providing suggestions to this manual.. 2007 changes to the 2006 document are underlined and *italicized*

Section 1. Introduction

The 2006 ECAC Mechanics Manual for Six Men is developed under the supervision of Bill Ward, Director of Football Officiating for the Eastern College Athletic Conference (ECAC). This manual is to be used for all ECAC football assignments. Deviations from this manual are not permitted unless authorized in writing by the Supervisor of Football Officiating for the Eastern College Athletic Conference. Where mechanics are not addressed in this document, ECAC crews may employ individual mechanics as long as they are within accepted norms and are thoroughly reviewed during pre-game conferences. Any questions or recommended changes to this manual must be submitted in writing/email to Bill Ward, Supervisor of Football Officiating for the Eastern College Athletic Conference.

Address: Bill Ward
1311 Craigville Beach Road
Centerville, Mass. 02632
email: bward@ecac.org

ECAC assigns 6 man crews for Division III (ACFC, Empire 8, Liberty, NESCAC, NEFC). The purpose of this manual is to provide uniformity and consistency in the administration of ECAC games. This manual will assist experienced officials in maintaining their effectiveness and aid new officials in developing their skills and potential.

Within this manual officials are designated by their position or letter designator (**Referee** {R}, **Umpire** {U}, **Head Linesman** {H}, **Line Judge** {L}, **Side Judge** {S}, **Field Judge** {F}).

To obtain an ECAC on-field football officiating assignment officials must:

- A. be an active member of an approved EAIFO chapter and have paid ECAC dues for that season.
- B. submit an ECAC approved doctors certificate stating he is physically capable of completing his duties as an on-field official
- C. attend an EAIFO pre-season clinic and participated in and passed the physical conditioning drills as well as the ECAC closed book clinic exam.

Deviations from this policy will be handled on a case-by-case basis.

Section 2. ECAC Officiating Uniform

ARTICLE 1. ARRIVAL APPEARANCE. Officials (including game and 25 second clock operators) will arrive at the game site in appropriate attire. Which includes coat and tie with appropriate slacks. The ECAC dress shirt is encouraged.

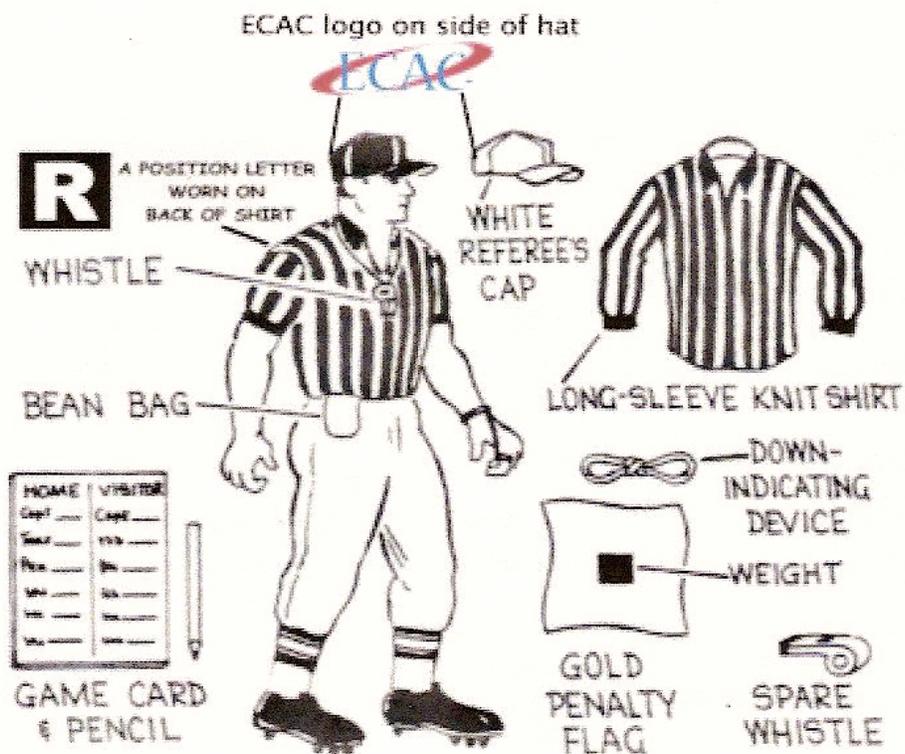

ARTICLE 2. TRADITIONAL ON FIELD UNIFORM: For all ECAC assigned games the uniform worn shall include:

- A. **SHIRT:** A standard black and white knit, long tail, one inch vertically striped official's shirt with pocket on left breast, knit byron collar and black cuffs. The **Referee** will determine sleeve length for the entire crew. If mesh shirts are worn the entire crew must wear them. A 10 1/2 X 8 inch NCAA position placard (white on black) will be worn on the back, centered on the stripes. **R- Referee, U – Umpire, H – Head Linesman, L – Line Judge, F – Field Judge, S – Side Judge.** If the placard is Velcroed into place (FJ/SJ/BJ) it must be worn so there are no discernible puckers around the perimeter. An American Flag (approx. 2 X 3 1/2 inches) must be worn centered one inch above the breast pocket. If an official has an older shirt with the flag sewn onto the breast pocket he may wear that shirt until it is replaced. All new shirts will have the flag placed above the pocket.
- B. **KNICKERS:** Standard all white regulation football official's knickers must be worn with slight overlap below the knees (not more than four inches).
- C. **STOCKINGS:** A one-piece football stocking will be worn. They must be white above the top of the shoe heel between 3 to 4 inches in height followed by a 2 to 2 1/4 inch black stripe. Then alternating stripes: white (1/2 "– 5/8 "), black (1/2 "– 5/8 "), white (1" – 1 1/4"), black (1/2 "– 5/8 "), white (1/2 "– 5/8 "). The width of the black between the bottom of the knickers and the top of the white stripe should be between 2 – 2 1/4 inches.
- D. **SHOES AND BELT:** Mostly black shoes with black shoelaces should be clean and polished. Black belt should be 1 1/2 – 2 inches wide with inconspicuous buckle.
- E. **CAP:** Brooklyn style solid black cap with white piping (ECAC emblem on right rear). **Referee** will wear Brooklyn style all white hat (ECAC emblem on the right rear). All hats will be fitted (sized)
- F. **FOUL MARKERS:** All officials will be equipped with at least one (two recommended) 15" X 15" light gold foul marker. Marker should be center weighted to allow the marker to be thrown appropriate distances. Marker can be worn in belt or carried in a pocket – but must be carried inconspicuously.
- G. **BEAN BAGS:** At least one beanbag may be worn in the belt. They may be white or royal blue but entire crew must be use the same color beanbag.

- H. **MISCELLANEOUS:** Each crewmember must carry: an information card and writing implement to record fouls, timeouts etc.; an elastic down indicator (**Umpire** may wear a second indicator to track ball location); a primary and secondary whistle. The whistle may be either a finger or lanyard whistle. When using a finger whistle the official must be diligent in not giving “half signals” while using the whistle. If gloves are worn they must be primarily black. Officials responsible for timing issues should have a countdown style black watch. If visible, underclothes (T shirt or turtleneck) should be black. No undergarments should show through any piece of uniform. Jackets and sunglasses are not part of an ECAC official’s uniform. Officials should carry spare whistles, pencils, beanbags, down indicators, line clips etc.
- I. **GAME REPORTING FORMS.** All Officials will carry a game card to document game information to include Team Captains, team timeouts, down and distance at the end of 1st and 3rd periods and fouls called (type of foul, number of player committing foul, whether foul was declined or accepted and time called. The officiating crew must have an NCAA foul reporting form as well as an ECAC Ejection form.

UNIFORM AND EQUIPMENT

ARTICLE 2. UNIFORM CHECK:

Check your uniform and equipment before leaving home and again check each other's uniform during the pre-game conference. Test whistles and watches (spares where appropriate), Have shoes polished and uniform clean. Shoes should be polished prior to site arrival. Do not polish shoes during pre-game! **Replace uniform items** as they become worn or faded!

Section 3: Pre-game Duties – Before Arrival on the Field

ARTICLE 1. GAME SITE ARRIVAL: The **Umpire** is responsible for arranging transportation to ensure the crew is at the game site in time to begin their pre-game conference no later than three hours prior to scheduled game time. ECAC assigned game clock and 25-second clock operators must arrive at the game site no later than 90 minutes prior to scheduled game time. and must visit with the crew in the locker room. See above for dress requirements for entire crew.

ARTICLE 2. PRE-GAME CONFERENCE:

- A. The **Referee** will begin the conference no later than 3 hours prior to scheduled game time. Attendance at the conference is mandatory. If taping is required it must be done prior to or after the conference. If an emergency dictates the **Head Linesman** will assume the role of conference leader. There should be no unauthorized visitors in the official's locker room during the conference. If an official wants to bring a visitor to the locker room (unassigned/potential ECAC official, etc) he must obtain approval from the ECAC Supervisor of Football Officials. This does not preclude officials from having family members/acquaintances in the locker room if they are performing an official function (ball person, NCAA Foul Report). Their presence must add to the professional atmosphere of the pre-game conference.
- B. The conference should follow a pre-determined guide established by the **Referee** (see attachment B). All crewmembers should contribute to the conference through questions and/or comments. The discussion should focus on both rules interpretations and ECAC crew mechanics. Specific attention should be paid to interaction and communications between all officials.
- C. During the conference the **Side Judge** will ensure that the crew has the correct time and he will also discuss game timing issues with the game clock operator upon his arrival.

ARTICLE 3: COACHES VISIT: Approximately 90 minutes prior to scheduled game time the **Referee** and **Umpire** will visit the respective coaches (home team first if possible).

A. Referee will:

1. confirm correct time, time of kickoff, length of half time and TV time outs, if appropriate.
2. review any unusual game situations
3. obtain name of “get back” coach and who is to receive foul reports during the game.
4. if game programs are unavailable, obtain team captains names and numbers.
5. NOT discuss issues regarding opponents. If a coach has a problem he should notify the ECAC Supervisor prior to the game. Make visit concise.

B. The Umpire will:

1. Obtain equipment certification from the coach
2. Check with athletic trainer for casts and padding
3. Make spot check of players if appropriate
4. Check with defensive coaches for defensive signals.

C. Referee and Umpire MUST ensure the information obtained during this visit is passed to the other crewmembers when they return to the official’s locker room. If possible, they may obtain the game balls from each team during this visit.

ARTICLE 4. GAME BALLS: Approximately one hour prior to scheduled game time the **Field Judge** will receive, test and certify new or nearly new game balls from each team. Up to 6 balls may be submitted for approval. If weather conditions warrant, more game balls may be approved at half time.

ARTICLE 5. TIMER CONFERENCE: Upon arrival of the game and 25-second clock operators the **Side Judge** will conduct a thorough pre-game briefing with the assigned clock operators (see attach A).

- A. **Side Judge** and the **Game Clock Operator** will ensure each has operating watches and their watches are synchronized.
- B. **Game Clock Operator** and **Play Clock Operator** will meet with the **Referee** after his return from the coach’s visit to discuss signals and emergency communications.
- C. **Game Clock Operator** will also ascertain the length of the approved halftime period

Section 4: Pre-game Duties – On Field

ARTICLE 1. FIELD ARRIVAL. The officials will arrive *on field* and observe team warm-ups in the following sequence:

- A. Sixty minutes prior to scheduled game time the **Side Judge** and **Field Judge** will enter the field.
- B. At 40 minutes prior to scheduled game time the **Line Judge** and **Head Linesman** will replace the **Side Judge** and **Field Judge** *If one or both teams leave the field area, the officials may retire to the dressing room and come out with the rest of the crew at 20 minutes.*
- C. .
- D. At 20 minutes prior to scheduled game time all officials will be on the field.
- E. While observing team warm-ups, officials should stay along the sideline and off the field of play unless there is a specific duty you must perform. Avoid “casual” conversations. If communication is required keep it concise and professional.
- F. During team warm-ups officials will be attentive to player conduct and the legality of equipment and player uniforms. If equipment or uniform issues are discovered notify the team’s Athletic Trainer is and document the players number on the officials game card.

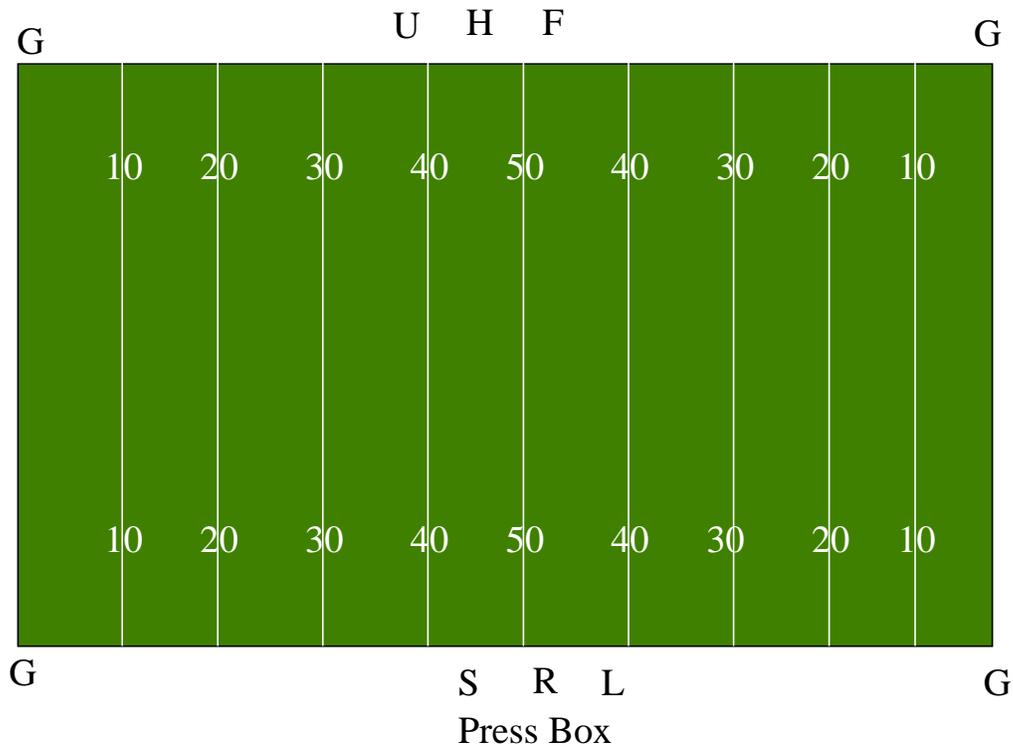

ARTICLE 2. DUTIES COMPLETE: After the pre-game duties are complete each official should take their position along their assigned sideline close to the 50-yard line.

- A. **Side Judge** and **Field Judge** leave the sideline in time to get team Captains from locker room and have them at the 50-yard line in the team area at 3 minutes prior to scheduled game time. They should keep in mind the location of the team’s locker room and adjust their departure accordingly.
- B. **Head Linesman** and **Line Judge** leave the sideline in time to notify the head coach at 5 minutes prior to scheduled game time. They will stay with the team to ensure they arrive on time to start the game at the scheduled time. They should keep in mind the location of the team’s locker room and adjust their departure accordingly.
- C. Keep conversations with team personnel to a minimum and on a professional level. Avoid the appearance of being “overly friendly”.
- D. **Head Linesman** will conduct a thorough conference with the Chain Crew (see attachment B). He should ensure:
 - 1. the chain is the correct length
 - 2. a *device* is available to mark the 5-yard intersection
 - 3. the chain is marked with a mid-point marker
 - 4. the Chain Crew is briefed on proper movement and chain placement.
 - 5. Chains will be initially set on the sideline

6. The *device is* placed at the five-yard mark closest the rear post.
 7. The chains and box will then be moved six feet off the field of play.
- E. **Side Judge/Field Judge/Line Judge.** Ensure game balls are available and instruct sideline personnel on the correct rotation of replacement balls. Ensure they remain off the field of play. (See Attachment C)
- F. **Referee and Side Judge** will inspect the entire field: Observe correct placement of field markings, pylons and goal post padding. Notify game management of any hazardous conditions and ensure they are remedied prior to game time. Locate press box phone if installed.

Pre-toss positions

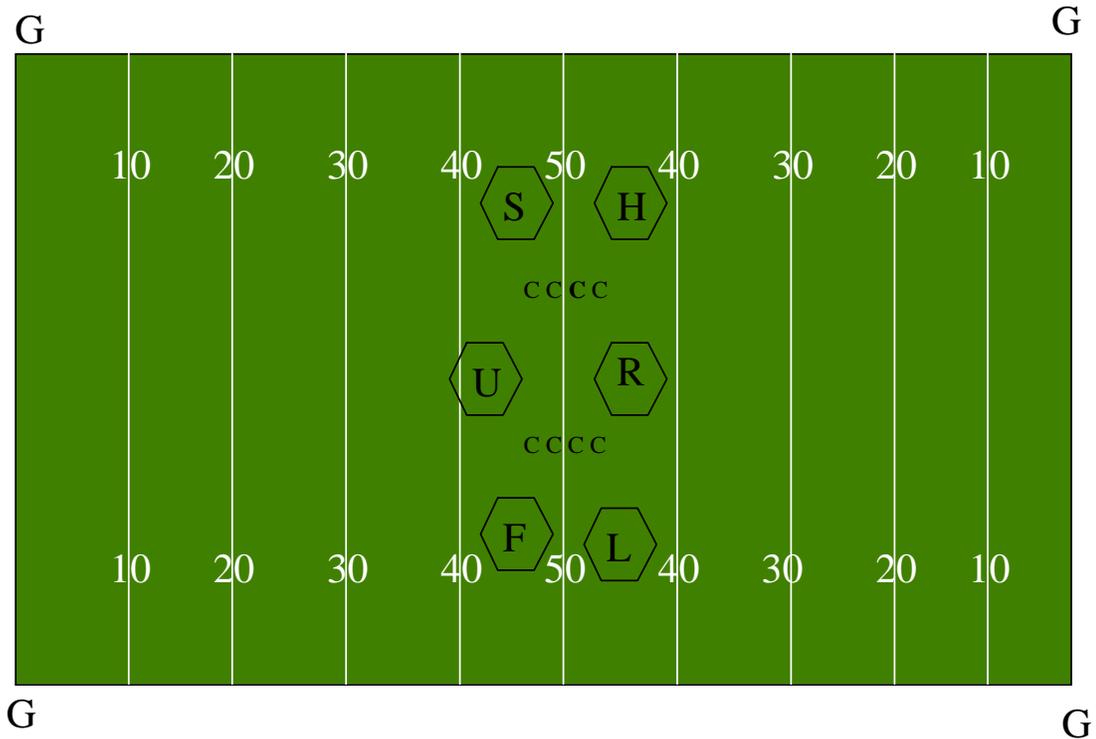

Section 5: Coin Toss

ARTICLE 1. PRE-COIN TOSS

- A. Approximately 4 minutes prior to scheduled game time, at the **Referees** signal, the **Referee** and **Umpire** will leave their respective sidelines and meet in the middle of the field.
- B. At approximately 3 minutes prior to scheduled game time the **Referee** will indicate to the **Side Judge** and **Field Judge** to send their respective Captains to mid-field. The **Side Judge** and **Field Judge** will escort their Captains to the nine yard mark and then remain in that position to keep players away from the coin toss (inside the 9 yard marks)

ARTICLE 2. COIN-TOSS

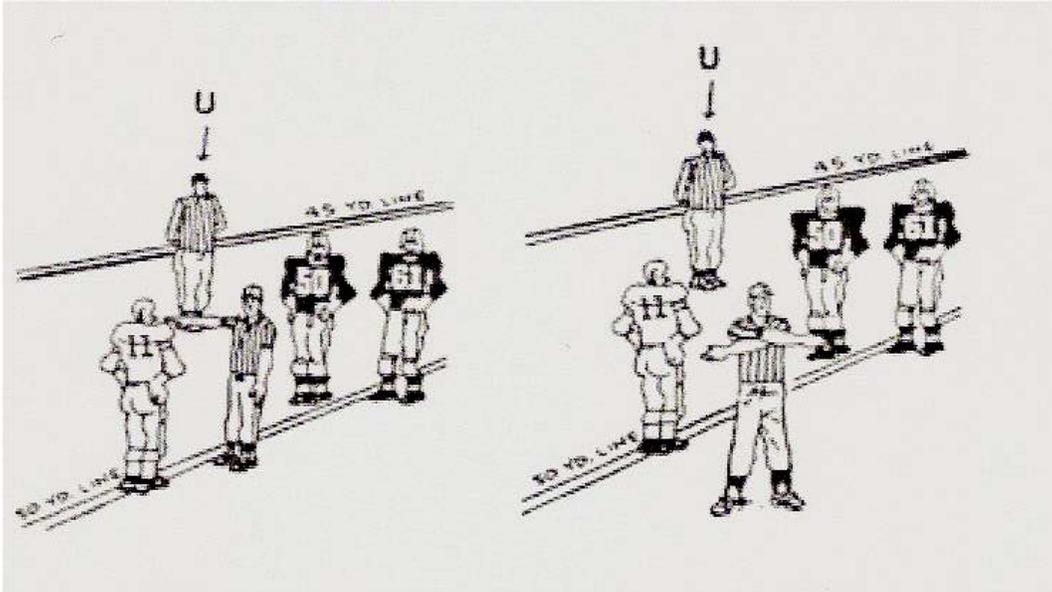

- A. **Referee** will position the Captains with their backs to the sideline He will introduce himself and the **Umpire**. **Umpire** is normally positioned opposite the **Referee**. Keep the instructions concise. Ask the visiting Captain to call his option prior to the toss. Confirm the call with the **Umpire**. Catch the toss and display result to Captains (no need to turn coin over).
- B. Obtain winning Captain's choice. If choice is to defer step clear of players and tap winning Captains shoulder and give a clear "incomplete pass" signal (official signal #10). . Then obtain Captains option . If option is to receive place Captains in appropriate direction and give the "reception" signal. If the option is to kick then place the Captains in the appropriate direction and give the "kicking" motion (official signal #30). If the option is to defend a goal place the Captains in the appropriate direction and signal with both arms at chest level pointing in the direction the team will be going.
- C. When the kicking team has been identified, the **Line Judge** will obtain the kicking team's ball and bring it to the **Umpire** after the coin toss procedures are complete.

Press Box

OPTION DEFERRED TO SECOND HALF

ARTICLE 3. POST-COIN TOSS

- A. All other officials should keep players away from the middle of the field and monitor post-coin toss activity. They should then assemble at the middle of the field with kicking team's ball. Check cards for options and direction of kick.
- B. Do NOT do a "hand clasp" in the middle of the field. When possible disperse to your Free Kick positions prior to playing of the National Anthem. Otherwise, all officials should stand in the middle of the field, with their hats held over their hearts and the other hand at the side.

Section 6: General Game Duties

ARTICLE 1. SUBSTITUTIONS AND COUNTING PLAYERS

- A. All officials are responsible for legality of substitutions.
- B. The **Referee, Umpire** and **Line Judge** are responsible for the correct number of players on the offensive team. The **Field Judge** and **Side Judge** are responsible for the correct number of players on the defensive team.
- C. For Free Kicks, the **Umpire, Side Judge** and **Field Judge** count the kicking team. The **Referee, Line Judge** and **Head Linesman** count the receiving team.
- D. The accepted mechanic is to indicate a correct count with a closed fist (for wing and deep officials “thumbs up”) held at shoulder level. If there are too many players then a dead ball flag should be thrown once an official(s) has completed his count.
- E. See Attachment E for procedures during a “rushed” substitution.

ARTICLE 2. COMMUNICATIONS

- A. All officials will make written record of charged timeouts and scores. Each official must record all fouls he called including the fouling player’s number, time of the foul, and whether the penalty was accepted or declined. The **Referee, Umpire** and **Head Linesman** will record down, distance and position of the ball at the end of the first and third periods.
- B. The responsible sideline official will report fouls promptly to the team area (Head Coach unless otherwise directed) including, foul, player, status of ball and penalty options.
- C. Official’s conferences. Keep conferences concise and limit attendance to only those officials necessary to resolve any issues. Other officials will monitor players, keep them away from the conferring officials and communicate with sidelines. Do not try to “guess” the outcome of conference!!

ARTICLE 3. BALL ROTATION (see Attachment C)

- A. When ball becomes dead deep in the side zone the ball will be immediately placed at the feet of the covering official. AFTER ALL DEAD BALL ACTION HAS CEASED, the appropriate side official (normally the side official not holding the spot) will obtain the correct team’s ball from a ball person and relay the it to the **Umpire**.

- B. Keep “side zone” ball in place until the **Umpire** has established the inbounds spot. **KEEP BALL PEOPLE OFF THE FIELD OF PLAY.**
- C. After all change of possessions the appropriate team ball will come from the Press Box side (**L/FJ**).

ARTICLE 4. CALLING FOULS. ALL OFFICIALS. Each official should watch for fouls and, where appropriate, determine its impact on the play. Officials should then indicate the foul in the following manner:

- A. Mark spot of foul with foul marker. Make mental note of position of foul marker. When play is over either hold the dead ball spot or the spot of your flag. Wait for another official to relieve you of your spot/flag. If appropriate, move the foul marker to the correct spot prior to reporting the foul to the **Referee**.
- B. Recognize the number of fouling player (if conditions make it difficult to ascertain number, identify by position). Under no circumstances should an official report a number of which he is not certain (do not “make up” a number).
- C. Recognize status of the ball when the foul occurred.
- D. Recognize status of clock when foul occurred and time of foul.
- E. After reporting the foul to the Referee, record relevant information on game card.
- F. The calling official has primary responsibility, along with the Referee, for knowing the correct penalty options and seeing that penalty enforcement was administered correctly.
- G. If you are not the calling official, cover all important spots, i.e. dead ball, spot of flag, previous spot, etc. If you are the responsible sideline official for reporting fouls to the team area, hustle into the Referee and get all the relevant information and pass it on to the appropriate coach.
- H. When announcing/signaling the foul(s) the **Referee** will ensure he is visible to the press box. For live ball fouls he will give a preliminary signal and then, after obtaining the captains choice, he will display the appropriate signals to the press box. For dead ball fouls a preliminary signal is not required.
- I. If there is a requirement for player disqualification the **Referee** and calling official will escort the player to the sideline before giving the final penalty signals. If the **Referee** has called the disqualification he will take another official with him to the sideline.

ARTICLE 5. TIMEOUT/SCORING SIGNALS. ALL OFFICIALS

- A. The covering official and the **Side Judge** are responsible for determining the status of the clock when a play becomes dead. When appropriate the covering official will give a clear timeout signal (under normal circumstances no more than three passes above the head). This signal should be mirrored by the opposite official (**Head Linesman’s** mirrored by the **Line Judge** or **Side Judge** mirrors the **Field Judge**). When timing is

- critical it may be appropriate for all officials to echo the timeout signal. Keep in mind the location of the clock operator and the relative location of the ball to determine if other officials need to echo the signal.
- B. If the ball becomes dead inbounds near the sideline (within 2 yards) and the down clearly results in a first down, the covering official will give a “wind the clock” signal then immediately stop the game clock.
 - C. For passes that fall incomplete the covering official should indicate by giving a clear incomplete signal while standing erect and with arms passing at chest level. Be stationary when giving the signal. No timeout signal is required. Additionally, no timeout signals are required after any scoring/touchback signal.
 - D. If a covering official has a foul, which would negate an apparent touchdown, he should not give the touchdown signal when the ball is legally in possession of a player behind his opponent’s goal line. He should signal timeout and immediately report to the **Referee**.
 - E. Other officials should not echo touchdown, touchback, or safety signals.
 - F. The **Umpire** should allow the side officials to rule on touchdowns even though he may see the ball in possession of a player behind his opponent’s goal line. The **Umpire, Line Judge and Head Linesman** may determine in the pre-game conference a signal to communicate when the **Umpire** sees the ball in player possession in the opponents end zone.

ARTICLE 6. IN THE INTERVAL BETWEEN DOWNS

A. Referee Responsibilities:

1. After each scrimmage down, the **Referee** will initially position himself approximately 10 yards behind the inbounds spot away from the offensive huddle/formation. He will check the down and distance with the **Head Linesman** and clock status (if appropriate) with the **Side Judge**.
2. He will position himself so he is visible to the game clock and 25-second clock operator and he will ensure the other officials, including chain crew (at least the down box if time is critical) are ready. He will then give the correct clock signal (wind clock/ready for play). This signal should occur at the same time interval (approximately 3 seconds) after the ball is placed at the inbounds spot) throughout the game.
3. After the ready for play signal the **Referee** will observe the offensive huddle and potential substitution infractions. He will also count the offensive players. When he has the proper count he will indicate by holding a closed fist at chest level. The **Umpire** will conduct the same count and mirror the **Referee’s** signal when he has the correct number of Team A players. If Team A has fewer than 11 players the **Referee** will give a closed fist over the heart signal

(similar to signal # 22) to alert the wing officials of possible formation problems. The **Referee** should hold this signal until the offensive team begins its offensive signals. The **Umpire** may drop his signal when receiving the correct signal from the **Referee**.

4. After the offensive team breaks the huddle or assumes their offensive positions the **Referee** will assume his position on the throwing arm of the quarterback approximately 12-14 yards deep and on the outside shoulder of the Tight End's normal position to observe backs and tackle on his side.
5. If the offense team is attempting to run a "hurry up" offense or is running a "no huddle offense", the **Umpire** will remain over the ball until the **Referee** signals the **Umpire** to assume his position. The **Umpire** will verbally communicate to the offensive team not to snap the ball until the **Referee** gives lows his whistle for the Ready for Play signal. The **Referee** will signal Ready for Play when the **Umpire** is in the correct position.
6. **Referee** will check legality of backfield formation, eligible backfield players and legality of shifts/motion of players within his immediate field of vision (including the tackle on his side).
7. **All Officials** are responsible for ensuring the play is "shut down" if any dead ball foul is observed prior to the snap.

B. Umpire Responsibilities:

1. After play is dead move to approximate position of succeeding spot. Obtain ball from covering official or new ball from side official if dead ball is spotted in the side zone. **Umpire** should go into the side zone to retrieve the ball and place it at the succeeding spot.
2. Place ball at forward progress spot as determined by the covering official or the "soft spot" official if requested by the covering official. Remain on the ball until the **Referee** gives the Ready for Play signal. If **Referee** omits the Ready for Play signal remind him immediately. Move off ball after ball is spotted unless team is in hurry up offense (see above).
3. Assume position in the defensive backfield (approximately 5 yards deep inside the tackle positions), normally opposite the **Referee** but he must vary his position to avoid being used as a "pick" for pass plays and interfering with defensive movements.
4. Conduct offensive team count in accordance with procedures above.
5. Be alert for legality of player equipment.
6. As offensive team approaches the line of scrimmage, observe ineligible receivers and numbering requirements.
7. Be alert for defensive signals that simulate offensive signals.

C. Head Linesman Responsibilities:

1. Ensure correct dead ball spot. It may be appropriate to move onto the field to establish the correct spot or to help with dead ball officiating.
2. Help **Referee** in establishing forward progress behind the line of scrimmage. Do not “jump over” players to obtain a dead ball spot.
3. On critical spots “pinch in” to ensure correct spot and to “sell” the spot.
4. If the **Head Linesman** is the covering official the **Umpire** will place ball at the inbounds mark on his “downfield” foot.
5. If the ball is dead in the side zone the ball will be placed at his feet. If the **Side Judge** is the covering official the **Head Linesman** will obtain a ball from the ball person and relay to the **Umpire** for inbounds placement.
6. Ensure forward progress spot by the **Head Linesman** is correct. Provide **Head Linesman** with a “soft spot” if he is pushed off of his spot.
7. Ensure spot is correct and there are no fouls before directing the repositioning of the chains and down box. Be alert for possible measurement.
8. Ensure there are no fouls before relinquishing the spot to the **Umpire**.
9. Personally mark the sideline placement of the down indicator at start of a new series and ensure the down box and chains are moved off the sideline.
10. Communicate the correct down to the **Referee Umpire, Side Judge** and **Line Judge** by holding one arm straight above shoulder extending the appropriate number of fingers (closed fist for 4th down).
11. When a first down is awarded inside the 10-yard line, only the down indicator will be used.
12. Ensure correct substitution procedures.
13. Prior to the snap, know eligible receivers on his side of the ball, observe that all players are boxed in and all offensive players have complied with the 9-yard mark restrictions.
14. Make sure coaches and substitutes are clear of sideline by 6 feet.
15. Assume a position on the sideline, off the field of play prior to the snap. If a short yardage situation is anticipated be prepared to pinch immediately if necessary.
16. Check for false starts, encroachment, offside and other formation infractions (motion/shifts/player formations). To facilitate identifying formation problems observe 11-man count from the **Referee** and **Umpire**.
17. If a player goes in motion away from the **Head Linesman** he will maintain responsibility for the legality of that player’s continuous motion.
18. If the nearest offensive player is off the Line of Scrimmage the **Head Linesman** will notify **Line Judge** by extending his arm at shoulder length toward the offensive backfield. If the two nearest players are off the line of scrimmage he will extend his arm with two fingers extended. Hold that

position until the player adjusts to the line of scrimmage, goes in motion or the ball is snapped.

D. Line Judge Responsibilities:

1. Ensure correct dead ball spot. It may be appropriate to move onto the field to establish the correct spot or to help with dead ball officiating.
2. Help **Referee** in establishing forward progress behind the line of scrimmage. Do not “jump over” players to obtain a dead ball spot.
3. On critical spots “pinch in” to ensure correct spot and to “sell” the spot.
4. If the **Line Judge** is the covering official ball, the **Umpire** will place the ball at the inbounds mark on the **Line Judge’s** “downfield” foot.
5. If the ball is in the side zone the ball will be placed at **Line Judge’s** feet.
6. If the **Field Judge** is the covering official the **Line Judge** will obtain a ball from the ball person and relay to the **Umpire** for inbounds placement.
7. Ensure forward progress spot by the **Head Linesman** is correct. Provide **Head Linesman** with a “soft spot” if he is pushed off of his spot.
8. Ensure there are no fouls before relinquishing the spot to the **Umpire**.
9. Be alert for possible measurement and indicate to **Referee/Umpire/Head Linesman**.
10. Communicate the correct down with **Referee, Umpire, Head Linesman** and **Field Judge** by holding one arm straight above shoulder extending the appropriate number of fingers (closed fist for 4th down).
11. Ensure correct substitution procedures.
12. Make sure coaches and substitutes are clear of sideline by 6 feet.
13. Prior to the snap know eligible receivers on his side of the ball, all players are boxed in and all offensive players have complied with the 9-yard mark restrictions.
14. Assume a position on the sideline prior to the snap.
15. Check for encroachment, offside and other formation infractions (motion/shifts/player formations).
16. To facilitate identifying formation problems read 11-man count from the **Referee** and **Umpire**.
17. If a player goes in motion away from the **Line Judge** he will maintain responsibility for the legality of that players continuous motion.
18. If nearest offensive player is off the line of scrimmage the **Line Judge** will notify the **Head Linesman** by extending his arm at shoulder length toward the offensive backfield. If the two nearest players are off the Line of Scrimmage he will extend his arm with two fingers extended. Hold that position until the player adjusts to the line of scrimmage, goes in motion or the ball is snapped.

E. Side Judge and Field Judge Responsibilities:

1. When the ball becomes dead at the end of a down the **Side Judge** and **Field Judge** will move in an accordion-like fashion to provide coverage of player activity around and away from the ball. Close as necessary to provide a “presence” near any opposing players. Unless retrieving the ball or going out of bounds to protect a player, keep opposing players in front of you.
2. Immediately, after the end of each down, the **Side Judge** will note if the game clock is in the correct status- either running or off.
3. When all activity has ceased and the ball is dead deep in the side zone the **Side Judge/Field Judge** will obtain a new ball from sideline personnel and initiate its rotation towards the Umpire. If dead inside the 9-yard marks and the **Umpire** is delayed, these Judges may retrieve the dead ball and pass it to the **Umpire** for inbounds placement. If the ball is dead out of bounds, the primary responsibility for the **Side Judge** and **Field Judge** is to move quickly to the out of bounds spot and protect opposing players. Ball rotation is secondary.
4. The **Field Judge** and **Side Judge** will assume their pre-snap positions on the sideline approximately abeam one another 20 yards beyond the line of scrimmage
5. **Field Judge** will ensure *Play* clock operates in accordance with the Referee’s signals.
6. The **Side Judge** and **Field Judge** will count the defensive team and signal with a closed fist with thumb extended if there are eleven Team B players. If there are more than eleven, the official should indicate by tapping his thigh. The **Side Judge** and **Field Judge** will communicate the next down with the **Head Linesman** and **Line Judge**, respectively.

- F. All Officials.** *Clock status and game time are a crew responsibility. With the 2007 change to the inadvertent whistle requirement crews must be aware of the game time and status at the ready for play signal especially when timing becomes critical.* As the snap becomes imminent each official should exercise good **Game Awareness**. **Game Awareness** is keeping in mind down and distance, team tendencies, game time, etc. By anticipating potential plays an official is better prepared to officiate the upcoming down.

Section 7: Timing

ARTICLE 1. GENERAL

- A. All game clock timing is under the direction of the **Side Judge**. He is primarily responsible for recording game clock times and making certain the status of the game clock is correct.
- B. The **Field Judge** is responsible for the *Play Clock*, the intervals during team timeouts, media timeouts, between periods and half time.
- C. ECAC assigned **Game Clock Operators** are responsible for providing a secondary clock to “back up” the stadium clock. If the Home Team does not provide a down and distance operator the **Game Clock Operator** will provide that service. Obviously the game clock has priority, however, the **Game Clock Operator** should be able to maintain the majority of down and distance functions.

ARTICLE 2. CLOCK PROCEDURES

- A. The stadium clock will be run for at least 30 minutes before scheduled game time. At five minutes before scheduled game time the stadium clock should be turned off and set at 15:00. It will also run for the approved minutes during half time
- B. The **Referee** will determine when to start the clock for half time. He may, if appropriate, start the halftime shortly after he has declared the end of the second period.
- C. If the stadium clock becomes inoperative or malfunctions the **Referee** (if miked) or the P.A. announcer will notify the crowd that the stadium clock is not official and the official time will be kept on the field. The stadium clock may be ruled official once the **Clock Operator** has confirmed it is operating properly.
- D. During inoperative clock periods both benches will be advised of the official game time by the appropriate sideline official after each change of possession. More frequent notifications are appropriate if game situation allows. At the two minute mark (or at the first dead ball after the two minute mark) of the second or fourth periods the **Referee** will call an officials timeout to give each team a “two minute warning”. The game clock will re-start on the snap.
- E. The **Referee, and Line Judge** (or covering official) will wind the clock when the ball is legally touched in the field of play or when the ball exits the goal line into the field of play after having been touched legally by a member of Team B in his end zone.

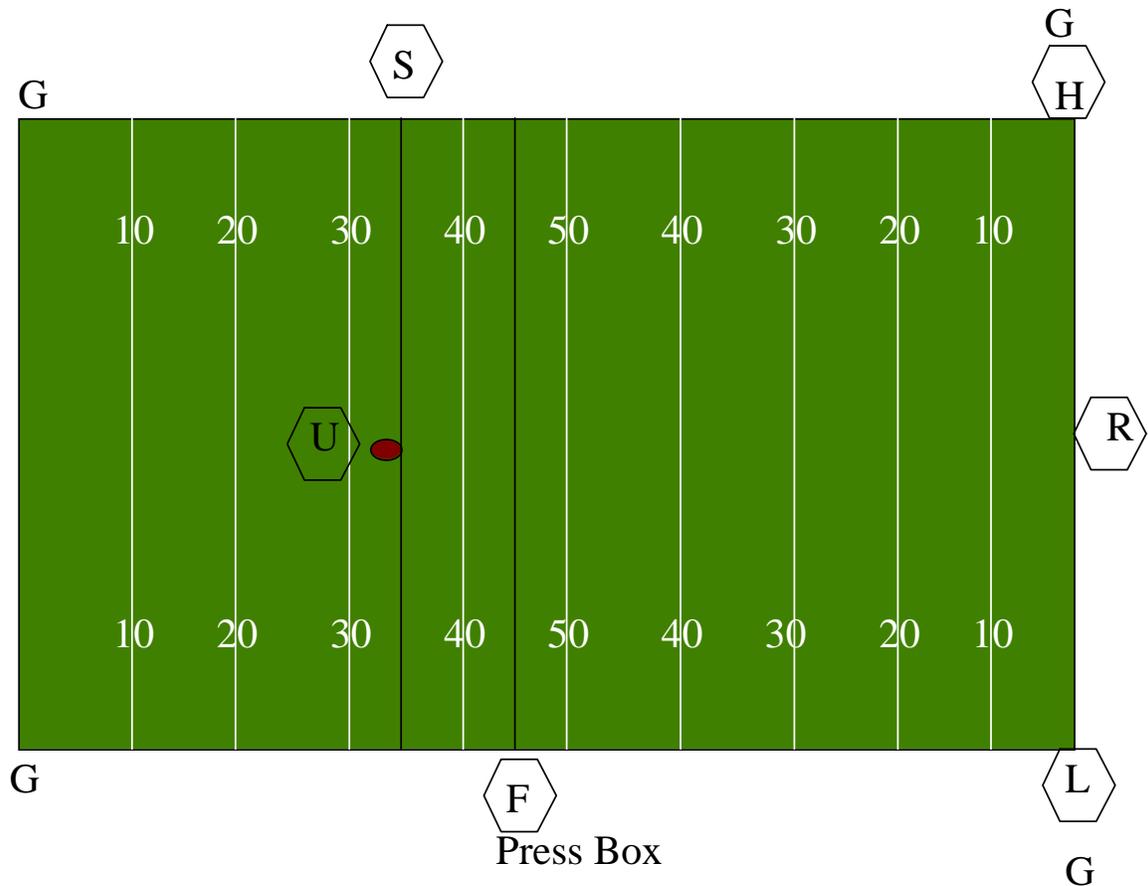

- F. If there is a significant pileup over a dead ball anywhere on the field any official may stop the clock if there will be a delay in getting the players un-piled. If it is stopped the **Referee** may then give a “wind the clock” signal prior to the Ready for Play signal if Team A retains possession.
- G. If the Play clock is started in error the **Referee** will indicate to reset the 25-second clock with a pushing motion toward the sky with his open palm. Do NOT stop the game clock to reset the 25-second clock.
- H. If **any official** recognizes an error in the game clock the **Referee** may correct the timing problem if he has exact knowledge of time gained or lost. Timing errors may only be corrected in the period in which they occur.
- I. When there is less than 25 seconds remaining in the period and the game clock is running the Play clock will be set to 25 seconds and not started on the Ready for Play signal.
- J. If there is a Delay of Game penalty the Play clock should be left at “00” until the penalty has been completed.

Section 8: Free Kicks

ARTICLE 1. BASIC FREE KICK MECHANICS

- A. Free Kick Sweep. If the Free Kick follows a score the officials will assume their positions in the following manner:
1. After a brief conference near the scoring goal line to determine if “onside” mechanics are required and to discuss any game issues and deliver the game ball to the **Umpire**
 2. The **Referee** will assume his position in the receiving teams end zone (or appropriate yard line after a Safety).
 3. The **Umpire** moves up the **Head Linesman’s** sideline to the kicking teams restraining line and waits for a signal from the **Field Judge** indicating 45 seconds have elapsed for the official’s timeout.
 4. The **Head Linesman** and **Line Judge** will assume their positions at the goal line (or appropriate yard line after a Safety).
 5. The **Field Judge** will time the official’s timeout while moving up the Press Box sideline to the kicking team’s restraining line. Once the official’s timeout is at 45 seconds he will signal the other crewmembers by raising his arm vertically over his head. *If both teams are ready do not wait for the expiration of the one-minute official’s timeout.*
 6. The **Side Judge** and **Field Judge** will assume a position on their respective sideline at the receiving team’s 25 yard line.
 7. Upon the **Field Judge’s** signal indicating 45 seconds have elapsed for the officials timeout the **Umpire** will go to the center of the field and the **Side Judge** and **Field Judge** will sweep the sideline ensuring team personnel are at least six feet off the sideline. The **Side Judge** is at the kicking team’s restraining line and the **Field Judge** is at the receiving team’s restraining line.

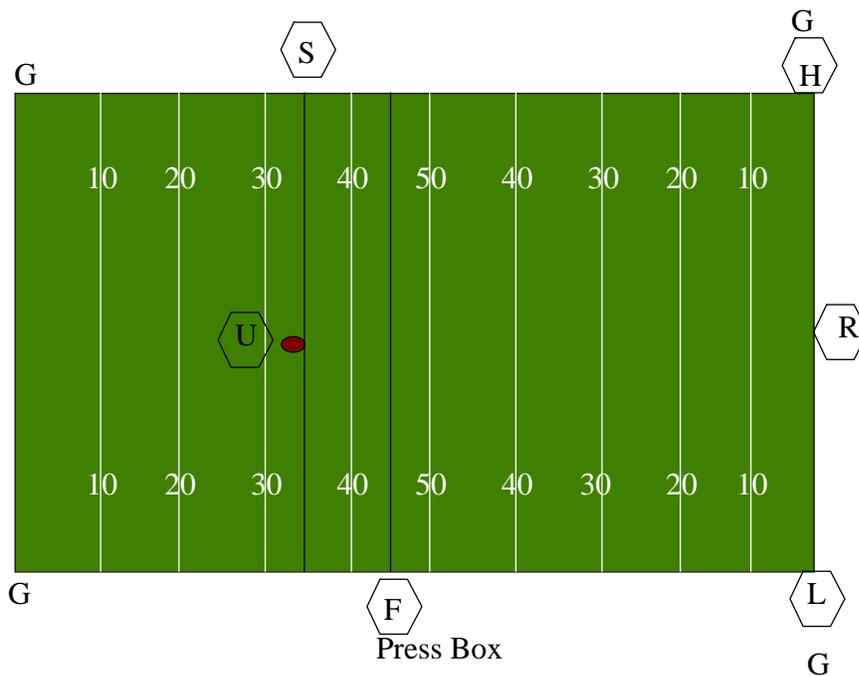

- B. Ready Procedures. **All officials** will ensure their respective teams leave the sideline in a timely fashion and Team A complies with the 9-yard restrictions. They will also check their respective teams for correct number of players. Use common sense and do not let a team begin the Free Kick with less than 11 players. Be discrete in notifying team personnel if they have less than 11 players.
1. The **Umpire** will check with the **Side Judge** and **Field Judge** will count the Kicking team players
 2. The **Umpire** will check with the **Side Judge** and **Field Judge** to ensure they are ready (signaled by raising one arm extended over head).. He will then signal the **Referee** that the kicking team and officials are ready by raising his arm over head.
 3. The **Referee, Head Linesman** and **Line Judge** will confirm the receiving team count and when the **Umpire** indicates the kicking team is ready he will initiate the “Ready for Play” signal (#1)
- C. Free Kick mechanics and coverage.

1. The **Umpire** has primary responsibility for kicking teams formation. Under normal circumstances he should be positioned immediately behind the ball when it is kicked. The **Referee** and **Field Judge** may provide help in determining legality of formation.
2. The **Field Judge** and **Side Judge** primary responsibility to ensure all members of the kicking team remain in the field of play. The **Head Linesman** and **Line Judge** have secondary responsibility. If a kicking team player leaves the field of play (voluntarily or blocked) the covering official will drop his hat at the spot. If the player returns (or fails to return promptly if blocked) he will throw a foul marker at the spot.
3. **Referee** has responsibility if the ball crosses the end line. He will assume responsibility for the receiver/runner if the ball is between the 9-yard line marks. If he does not have runner responsibility watch for illegal action ahead of the ball carrier.
4. **Line Judge** and **Head Linesman** have responsibility for the receiver/runner if he is between the 9-yard mark and the sideline. They will also rule on momentum or whether a runner has exited the goal line. They must communicate (eye contact) immediately if a runner steps out of the end zone and then steps back in. *When in doubt the runner has not left the goal line.* Quickly move up field with the action. Do not lag behind the play. Normal handoff to the **Side Judge/Field Judge** occurs at the 30-35 yard line. If the **Head Linesman/Line Judge** do not have receiver/runner responsibility watch for illegal action ahead of the ball carrier. If action moves away from them they may cautiously move onto the field to better observe the action (be alert for ball reversal)
5. The **Side Judge** and **Field Judge** will remain off the field after the ball is kicked and move downfield (approximately 15-20 yards). They will key the closest member of the receiving team on their respective sideline. Be alert for possible Fair Catch signals on any short kicks. Be alert for a breakaway. They have sideline responsibility to kicking team's goal line. The **Field Judge** will also help with the legality of the kicking teams formation.
6. The **Umpire** will rule on legality of kicking formation then observe any illegal action against the kicker. He will key the two receivers inside of the **Side Judge's** key. He will officiate from the inside toward the sideline and he has goal line responsibility for long breakaways. The **Umpire** should not be in a hurry to move toward the ball carrier

FREE KICK MECHANICS

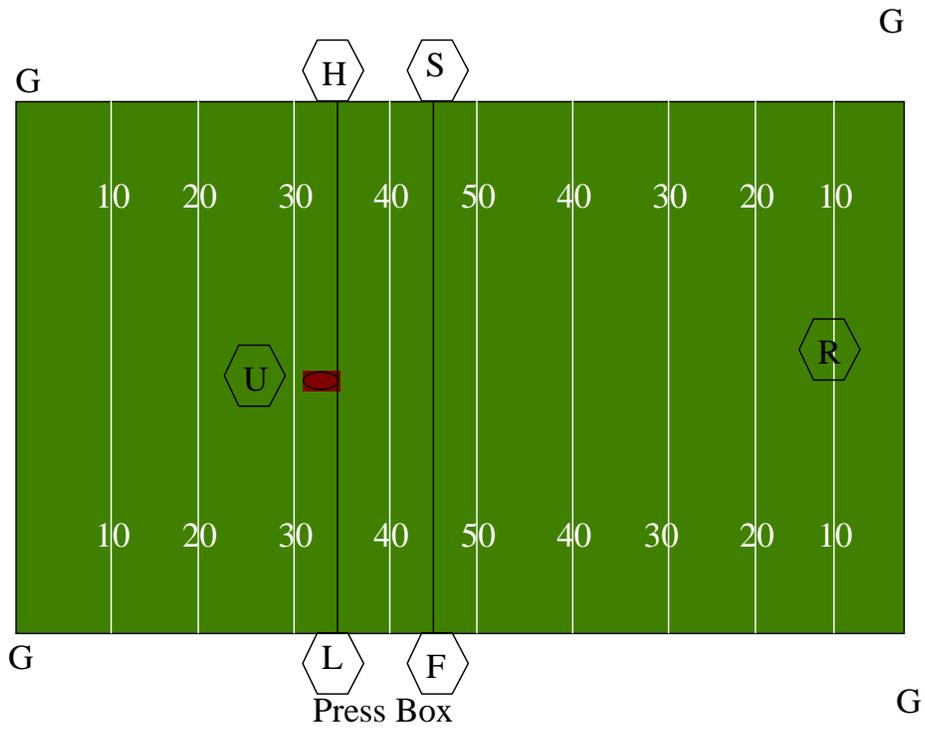

ARTICLE 2: ONSIDE KICK MECHANICS

- A. Determine whether onside kick mechanics will be employed prior to leaving the goal line after the score. Do not ask the kicker if an onside kick is imminent and do not give a signal. Officials will be positioned as follows:
1. **Umpire and Field Judge** will assume their positions in accordance with normal Free Kick mechanics.
 2. The **Head Linesman** and **Line Judge** will move to the kicking teams restraining line and the **Side Judge** will move to the receiving teams restraining line.

3. The **Referee** will assume his position in the middle of the field at approximately the 10 yard line but never closer than 10 yards behind the deepest receiver.
- B. After the kick.
1. If the kick is long, the **Referee** will have goal line and end line responsibility. He has the runner between the 9-yard marks. Be alert for a fair catch if there is a short “pooch” kick.
 2. The **Umpire, Field Judge** and **Head Linesman** will have responsibility for kicking team’s formation.
 3. Once the ball is kicked the **Umpire** will observe any illegal action by/against the kicker.
 4. The **Head Linesman** and **Line Judge** will observe any kicking team players beyond the restraining line prior to the kick. There is no “leeway” given to the kicking team under this circumstance. The **Line Judge** and **Head Linesman** will have primary responsibility for illegal blocks by the kicking team and illegal touching.
 5. The **Side Judge** and **Field Judge** have primary responsibility for the ball crossing the receiving team’s restraining line and touching of the ball by the kicking/receiving team. If a member of the receiving team touches the ball before or after it crosses their restraining line, the covering officials should give official signal #11. If the member of the kicking team touches the ball before it crosses the receiving team’s restraining line, he should drop his beanbag. If after the ball crosses the restraining line, give signal #11. They must quickly adjust for a short “pooch” kick and rule on Kick Catch Interference or on a fair catch signal. If the kick is deep they must quickly move downfield and assume responsibility for the runner if he is between the 9-yard mark and his sideline.

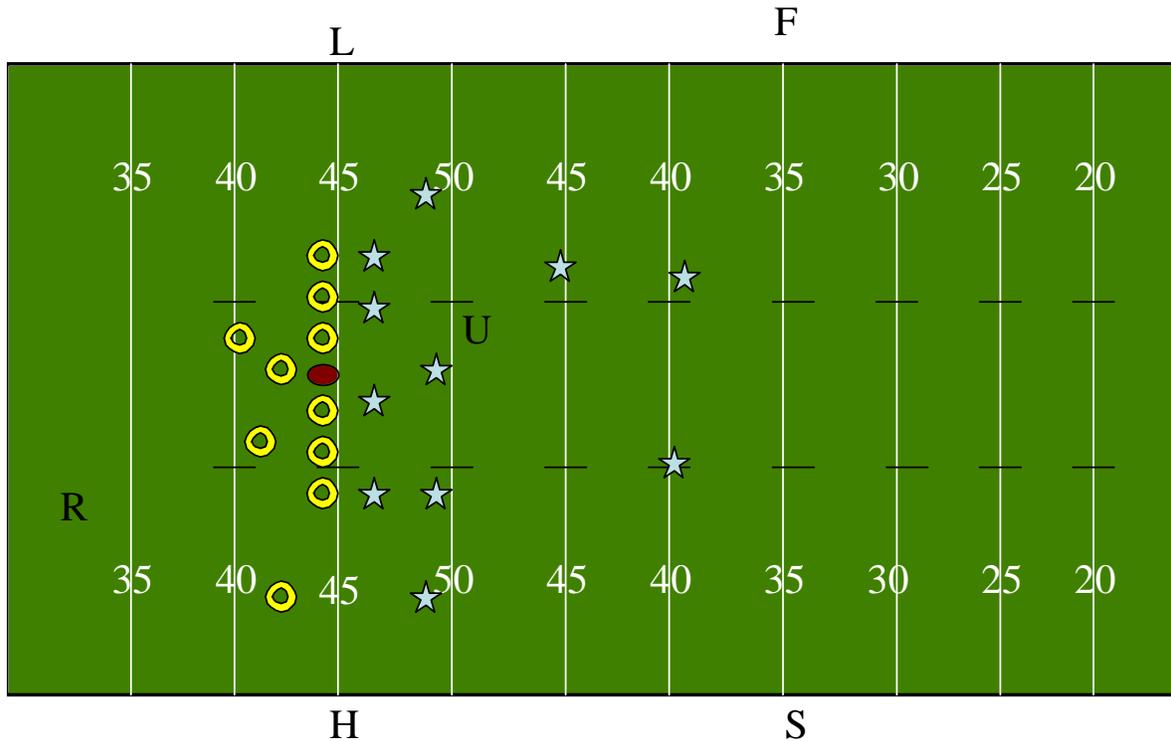

Section 9: Scrimmage Plays

ARTICLE 1: NORMAL PRE-SNAP POSITIONS

- A. The **Referee** will position himself 12-14 yards deep on the throwing arm of the quarterback and no closer than the outside shoulder of the tight end. Keep the ball in view. Give appropriate signals for offensive team count (fist extended at shoulder approximately shoulder height for eleven men. If Team A has fewer than 11 players he will give a closed fist over the heart signal (similar to signal # 22) to alert the wing officials of possible formation problems. .
- B. The **Umpire** will vary his position depending on the offensive formation, the position of the linebackers and line coverage with the **Referee**. He should be 5-7 yards deep. He must always be in a position to see the ball at the snap. He should be aware of eligible receivers using him as a “pick”. Give appropriate signals for offensive team count (fist extended at shoulder approximately shoulder height for eleven men, closed fist over the heart if team has fewer than eleven players). He should hold these signals until acknowledged by the **Referee**.
- C. The **Line Judge** and **Head Linesman** are positioned on the sideline straddling the neutral zone. If there is a short yardage situation the wings may come on to the field of play, being very cautious to keep the play boxed in and able to rule on sideline issues if required. Be ready to give eligible receivers the position of the Line of Scrimmage (indicate by an extension of the rear foot and, if necessary, verbalize by saying “here’s the line” – or similar verbiage. Do NOT tell a receiver to move up or back!! Give appropriate hand signals to other officials. These include:
1. If the widest eligible receiver on his side is off the Line of Scrimmage he will extend his arm at shoulder height into Team A’s backfield (closed fist for one receiver, two fingers for two receivers). Hold the arm in that position until the snap or the receiver has moved to another position. Mechanic need not be employed if Team A is in a tight formation and there is no issue concerning eligible receivers.
 2. When Team A is in an unbalanced formation and a wing official has 4 or more players on his side he will indicate this to the other wing with a signal that is agreed upon in the pre-game conference. He will hold this signal until acknowledged by the other wing.
- D. The **Side Judge** and **Field Judge** will normally be positioned 20 yards from the Line of Scrimmage abeam one another on the side line. They will communicate defensive team count by:
1. extending an arm at shoulder height to indicate eleven players.
 2. patting outside of thigh if there are 12 players. When/if both officials give this signal an appropriate penalty should be assessed.

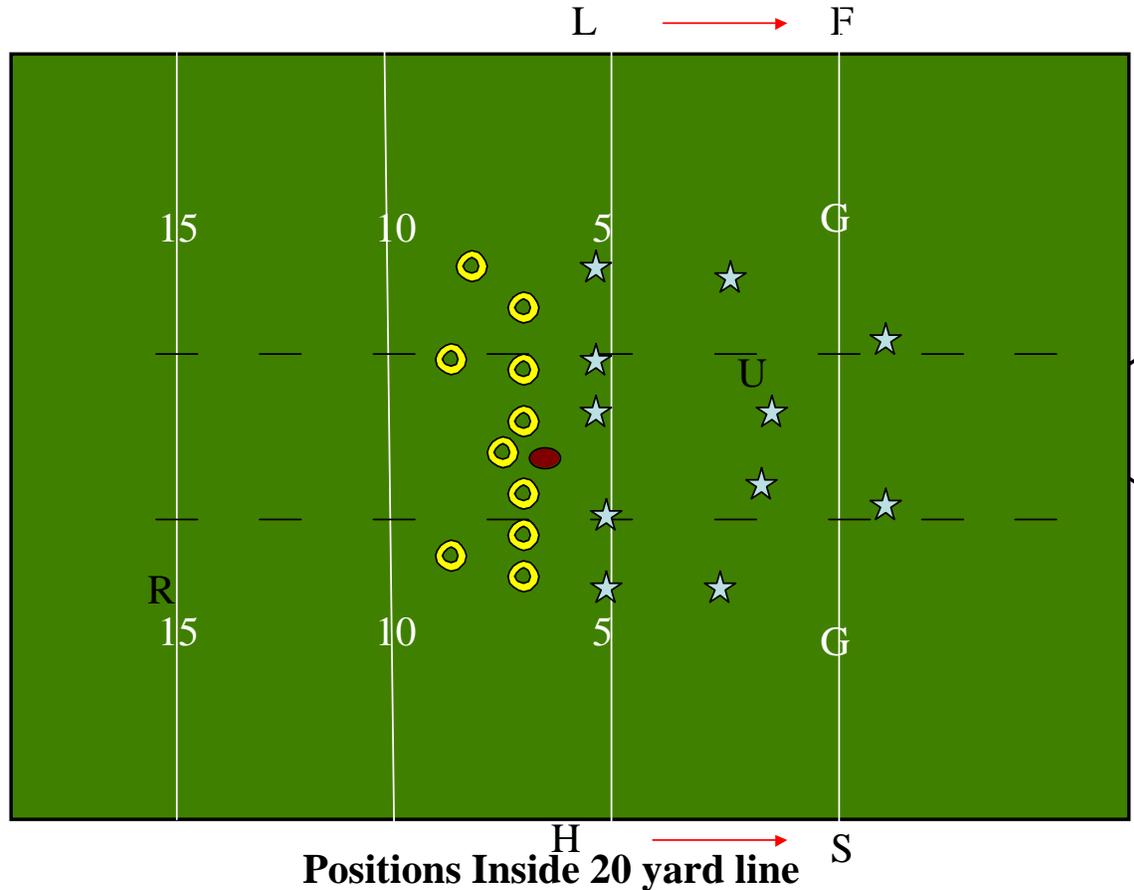

Press Box

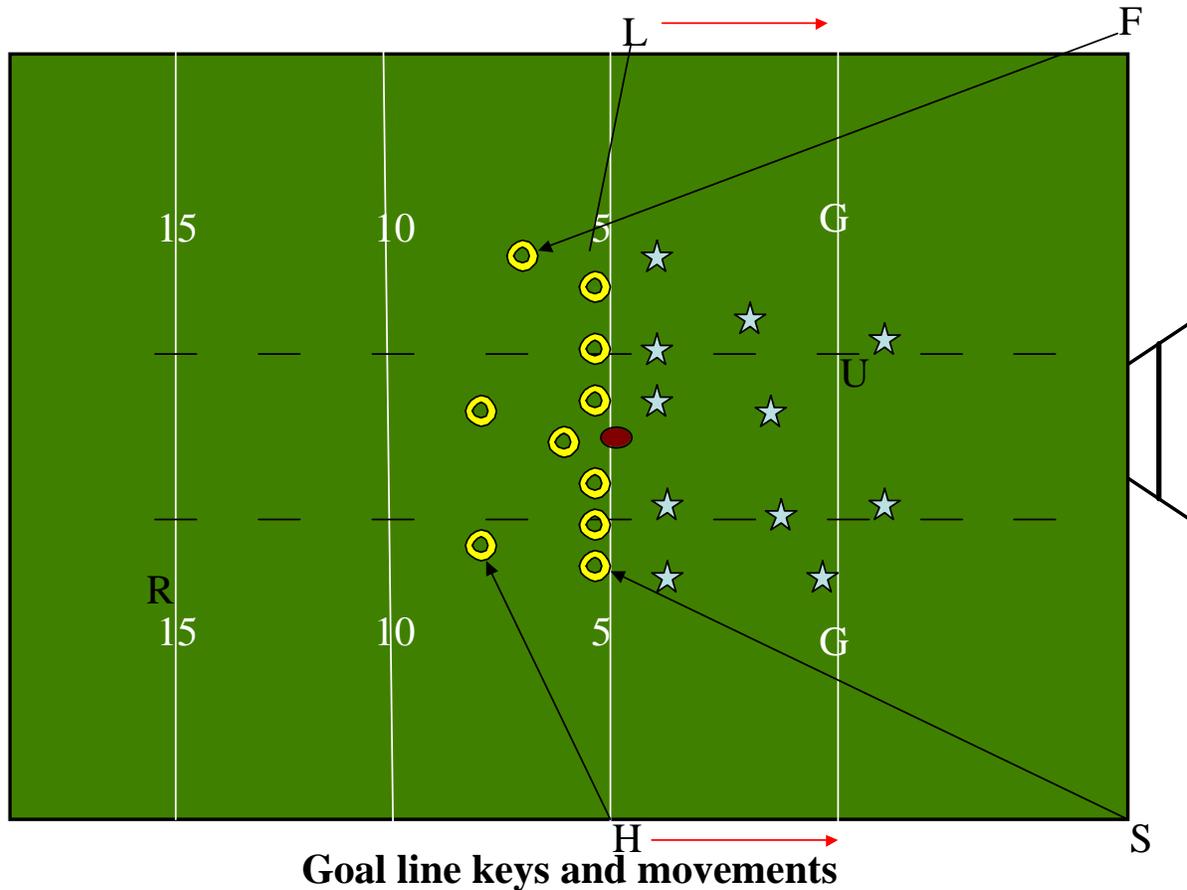

ARTICLE 2: GOAL LINE POSITIONS

- A. When the ball is snapped inside the Team B twenty yard line, up to the five yard line, the officials will assume the following positions:
1. The **Referee, Umpire, Line Judge** and **Head Linesman** will be positioned as normal.
 2. The **Line Judge** and **Head Linesman** are positioned on the Line of Scrimmage and are responsible for forward progress to the 2-yard line.
 3. The **Side Judge** and **Field Judge** are positioned at the goal line The **Line Judge** and **Head Linesman** will be responsible for forward progress to the 2 yard line and the **Side Judge** and **Field Judge** will be responsible for the goal line and forward progress inside the two yard line.

- B. When the ball is snapped inside the 5-yard line:
1. The **Referee** will be positioned as normal
 2. The **Umpire** will be closer to the Line of Scrimmage than on normal scrimmage plays but still maintaining a position that does not interfere with defensive movement. He is responsible for ruling on whether pass is thrown from beyond the Line of Scrimmage.
 3. The **Line Judge** and **Head Linesman** are positioned on the Line of Scrimmage but must get to the goal line at the snap. They should officiate from the goal line out.
 4. The **Side Judge** and **Field Judge** will be positioned at the intersection of their sideline and the endline.

- B. When the ball is snapped by Team A on or inside their own three yard line, **All Officials** will use the following mechanics:
1. Pre-snap positioning will be as on normal scrimmage plays.
 2. When the ball is snapped the **Head Linesman** and **Line Judge** will move to the Team A goal line and officiate forward progress from the goal line out. The officials must be in the proper position to officiate this critical part of the field.

ARTICLE 3: SCRIMMAGE FORMATION KEYS

- A. Prior to the snap the **Head Linesman, Line Judge, Field Judge, Side Judge** will observe specified Team A players based on offensive formations. These are referred

to as “Keys” and are used for observing initial action only. They need only be viewed for the initial action of the play. The official will then “read” the type of play (**pass or run**) and observe action in his area of responsibility. The following factors will be used in identifying appropriate keys:

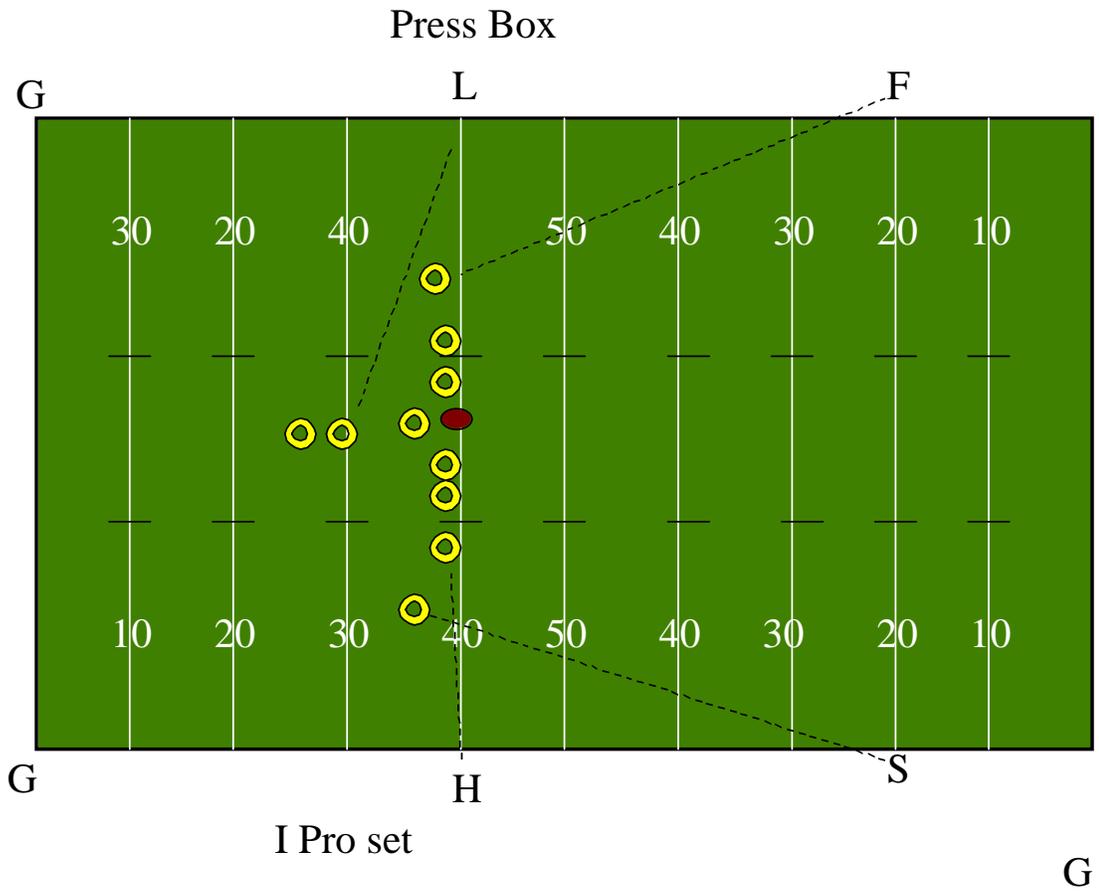

1. *Strength* of a formation is determined by the number of eligible receivers on the same side of the formation. The tight end is normally on the strong side of the formation.
2. A formation is *balanced* if there are an equal number of receivers on either side of the center.
3. The tight end is defined as the last man on the line of scrimmage who is no more than 4 yards from the nearest offensive interior lineman.
4. *Trips* is a formation with three or more eligible receivers outside the tackle on the same side of the ball.

B. The individual keys are:

1. The **Field Judge** and **Side Judge** will normally key the widest eligible receiver on their side either on or off the line.
2. The **Head Linesman** and **Line Judge** will key the tackle on their side plus the second inside eligible receiver on their side.
3. When there is motion the **Head Linesman’s** or **Line Judge’s** side, they are responsible for the motion man if he turns up field.

Double Wing Balanced

ARTICLE 4: AFTER THE SNAP – RUNNING PLAY

All officials will stay with their initial keys and observe action to read pass or run. Maintain “situational awareness” and be prepared to move to assume either pass or run coverage. After the snap, if officials read a running play, coverage is as follows:

- A. **Referee** observes action behind the Line of Scrimmage. He will take the runner to the neutral zone observing blocking at the point of attack. If there is a backward pass or handoff from the quarterback do not be quick to go away from the quarterback. On option plays the **Referee** has the trailing back if the quarterback turns up the field. Stay with the trailing back until there is no longer a threat of a foul. Follow plays into side zones and be prepared to aid in out of bounds action near the Line of Scrimmage. Be prepared to rule on a “shovel pass” plays. Once the play continues up field watch for any off-ball illegal action.
- B. **Umpire** observes action at the point of attack. If the ball goes into the side zone turn, he should turn and observe action – especially between the inbounds line and the nine-yard marks. The **Umpire** will “almost never” have forward progress. Allow the wing officials to obtain forward progress and terminate the play with their whistles.

- C. **Line Judge** and **Head Linesman** observe action on or by their nearest interior lineman (normally the tackle). If run is toward him he will observe blocking ahead of the runner. He has forward progress both behind and beyond the Line of Scrimmage. Take forward progress in his zone as far as possible. Once responsibility is released to the deep official try to stay 10-15 yards behind the play. When play goes away move cautiously on to the field keeping the play boxed in. Observe any illegal action behind the play and help the **Referee** in cleaning up behind the play. Be prepared to offer a “soft spot”
- D. The **Side Judge** and **Field Judge** observe action on/by the widest receiver on their respective side of the Line of Scrimmage. Pay particular attention for action “against the grain” (possible crackback). They are responsible for:
 - 1. action ahead of the runner if in their area.
 - 2. Clean up on “off-ball” action if ball is on opposite side of the field.
 - 3. maintaining a cushion as the runner moves up-field.
 - 4. sideline all the way to the goal line. On long runs they must be at the pylon as the runner crosses the goal line.
 - 5. cleaning up out of bounds action if their wing official has the spot.
- E. The **Side Judge** and **Field Judge** have goal line responsibility and **must not** get beat deep. On long runs they should be at the goal line pylon when the runner crosses the goal line.

ARTICLE 5: AFTER THE SNAP – PASSING PLAY

- A. **All officials** will stay with their initial keys and observe action to indicate pass or run. Maintain “situational awareness” and be prepared assume either pass or run coverage. After the snap, if officials read a pass play, coverage is as follows:
 - 1. **Referee** will observe the passer and drop back blockers in his field of view. Stay with the passer until all action has ceased around d him. Do NOT peek to watch flight or path of ball. Verbally alert defenders that the ball has been released (“gone”, “balls away” etc.). Be prepared to rule on intentional grounding. If in doubt drop the flag and get help form other officials. If necessary, after conferring and overruling the penalty, “wave” the flag off by facing the Press box and waving the flag twice in front above the head.
 - 2. **Umpire** carefully moves to the Line of Scrimmage observing the interior pass blocking. Observe any ineligible downfield and be prepared to help the **Line Judge** on whether the pass crosses the neutral zone. If there is a screen into the **Line Judge** side zone be prepared to help in identifying a pass that does not cross the neutral zone. He should also be prepared to pivot on quick passes to rule if a ball is trapped. If he observes a reception while the receiver is grounded he will sprint to the point of the catch. If it is not a reception give a stationary and clear incomplete pass at chest level. If ball is snapped inside

the Team B's 5-yard line the **Umpire** has primary responsibility for balls that cross the Line of Scrimmage.

3. The **Line Judge** will hold the Line of Scrimmage and **Head Linesman** will move 5 yards downfield. They will then officiate in the following manner:
 - a. Observe initial action of the tackle on their side of the Line of Scrimmage.
 - b. The **Head Linesman** will observe action in the 5-yard belt beyond the Line of Scrimmage.
 - c. The **Line Judge** will observe action on/by his eligible receiver.
 - d. They will maintain responsibility for action in their zones and must be prepared to quickly cover action and forward progress in their zones.
 - e. On quick passes into the side zone the **Line Judge** and **Head Linesman** must be ready to assist the **Referee** on ruling a pass forward or backward.
 - f. The **Line Judge** has primary responsibility for determining if a passer is beyond the Line of Scrimmage. He also has primary responsibility for ruling on passes that cross the neutral zone. If the pass is caught behind the neutral zone he will indicate by holding an extended arm with closed fist in the direction of the Team A backfield. The **Umpire** will have secondary responsibility.
 - g. When a pass is thrown out of an official's area of responsibility he will observe action "off the ball".
4. The **Side Judge** and **Field Judge** will observe initial action on/by his eligible receiver. They should:
 - a. let action on the play take him to the ball
 - b. be prepared to assume zone coverage and keep a cushion (about 15 yards) with receivers in your zone. ***Do not get beat deep.***
 - c. be prepared to rule on out of bounds calls on his sideline.
 - d. coordinate with the appropriate wing official on calls involving the sideline. A good rule of thumb is: the official who sees the back of the receiver rules on the sideline and the official who has the front rules on the catch. In either case make eye contact with the other official to ensure the call is properly coordinated. If there is any doubt, give no signal until verbal communication is given/received and then rule on catch versus no-catch.
5. The **Side Judge** and **Field Judge** have goal line responsibility and **must not** get beat deep. On long passes they should be at the goal line pylon when the runner/pass crosses the goal line.

Section 10: Scrimmage Kicks

ARTICLE 1. PUNT FROM OUTSIDE THE 50-YARD LINE

A. Positioning.

1. **Referee** will take a position parallel and 10 to 12 yards wide on the side of the punters kicking foot. If fourth down give “rolling fist” signal to remind other officials that the fourth down fumble rule is in effect. Be prepared for blocked kick or high snap.
2. **Umpire** will take a position slightly deeper (7-10 yards) than normal scrimmage down. Maintain view that allows observation of action on or around snapper.
3. **Head Linesman** and **Line Judge** will remain at normal scrimmage play formation. Pay attention to legality of punt formation. If fourth down give “rolling fist” signal to remind other officials that the fourth down fumble rule is in effect. Be prepared for blocked kick.
4. **Side Judge** and **Field Judge** will assume a position even with the deepest receiver with beanbag in hand. If fourth down give “rolling fist” signal to remind other officials that the fourth down fumble rule is in effect.
5. **All Officials** will perform normal pre-snap routines i.e. formation, team count, clock and substitution responsibilities.

B. Coverage.

1. **Referee** will watch ball to the kicker. Once it is secure immediately refocus on action of blockers (holding, blocking into kicker, etc.). Keep punter in peripheral vision. Refocus on kicker as he is threatened. Be prepared to rule on illegal contact. DO NOT take eyes off kicker to follow the ball as it is kicked. When ball is kicked verbalize that the kick is “gone”. If ball is touched give “tipped ball signal” (signal# 11). Once ball is away and kicker is no longer threatened look to see if kick goes out of bounds in-flight. If you have clear a view, assist the deep official in establishing the out of bounds spot by holding your hand above your head and dropping it as he comes to the spot where the ball crossed the side line. If kick is not out of bounds, move to the nearest inbounds mark and slowly move up field watching for illegal off-ball action. **Referee** has goal line responsibility on a long return.
2. **Umpire** will watch for illegal action on/by the center. Watch for other illegal line action (pull and shoot) after the snap. If kick is blocked or the ball is

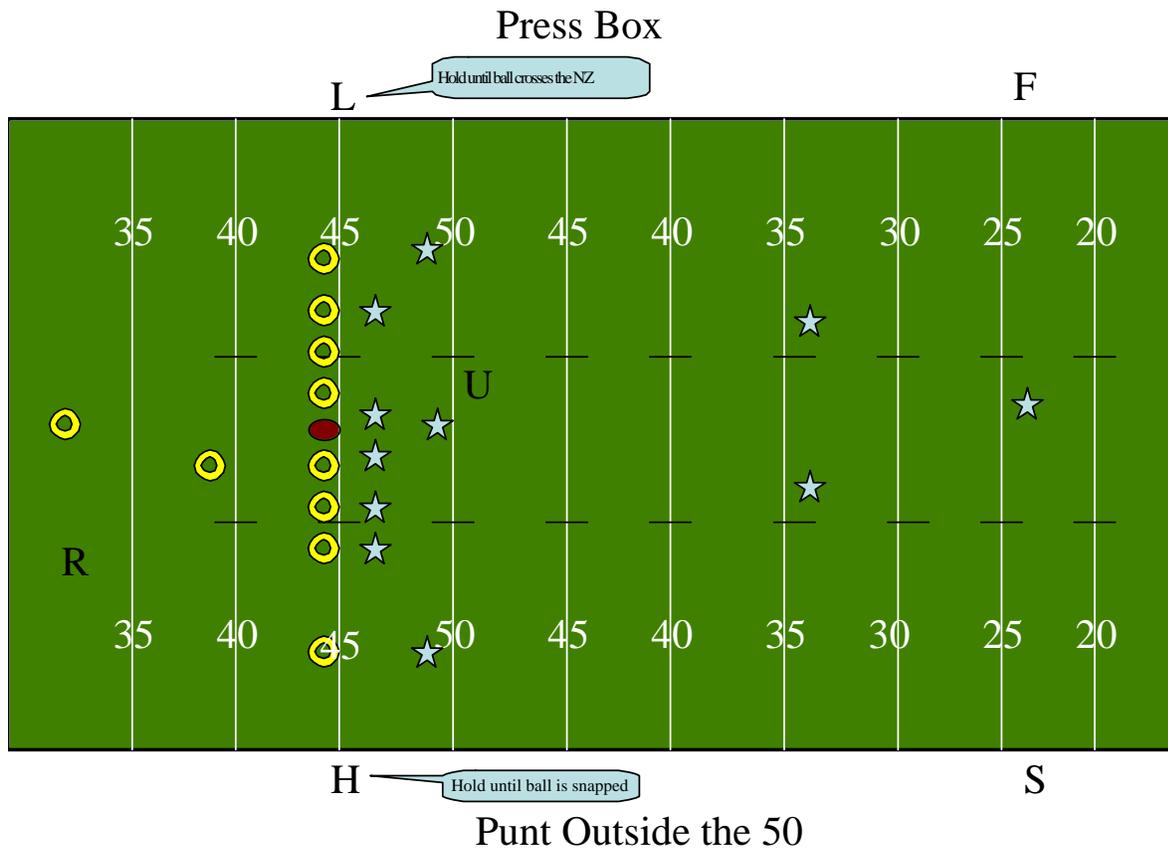

snapped over the kickers head move to the line of scrimmage to be able to rule on line of Scrimmage issues. After kick is away, clear action of players then move to the nearest inbounds line and slowly move up field watching for illegal off-ball action. Be alert for long return.

3. **Line Judge** will hold his position until the ball crosses the line of scrimmage. If the ball is blocked/snapped over the kickers head the **Line Judge** will assist the **Referee** for spots behind the behind the line of scrimmage. As the kick goes downfield the **Line Judge** will slowly move downfield and be alert for a long return, He has sideline responsibility all the way to Team A's goal line. Initial zones are: If ball/runner is in **Field Judge's** area concentrate on action just ahead of the runner, pick up the runner on long returns and have forward progress. The **Line Judge** will then have responsibility for the runner's progress while in his zone. If the kick is to the **Side Judge's** side watch for action away from the point of attack and keep the play boxed in.
4. **Head Linesman** will hold his position until the ball is snapped then move approximately 5 yards downfield. If the ball is blocked/snapped over the kickers head he should assist the **Referee** for spots behind the behind the line of scrimmage. As the kick goes downfield the **Head Linesman** will slowly move downfield and be alert for a long return, He has sideline responsibility all the way to Team A's goal line. Initial zones are: If ball/runner is in **Side Judge's** area, concentrate on action just ahead of the runner. Pick up the runner on long returns and have forward progress. The **Head Linesman** will then have responsibility for the runner's progress while in his zone. If the kick is to the **Field Judge's** side watch for action away from the point of attack and keep the play boxed in
5. **Side Judge** and **Field Judge** will initially cover action on/by the outside man on their side i.e. the gunners. They should then locate the football and assume responsibility for the receiver/runner if the ball is in their half of the field. They may use a predetermined (pre-game conference)signal to designate the covering official if the ball is in the middle of the field. If the ball is outside of their zone watch for illegal action in front of the receiver/runner (blocks, Kick Catch Interference, touching, etc.). If the ball is deep in the other official's zone it is appropriate to come off the sideline to provide better coverage. Be watchful for ball reversal. If the ball goes over the receiver's head in your zone go with the ball being attentive to goal line action/pylon action. If the ball is out of bounds in-flight on his sideline the official should establish a position clearly in advance of the out of bounds spot and slowly move up the sideline looking for the "chop" signal from the **Referee**. When **the Referee** signals stop by dropping his arm, place a ball at that point on the sideline. If the **Referee** indicates (pre-game signal if possible) he does not have a spot, establish the out of bounds spot in the best manner possible. If the kick goes

out of bounds after hitting the ground in the field of play, the covering official will mark the spot without help from the **Referee**.

6.

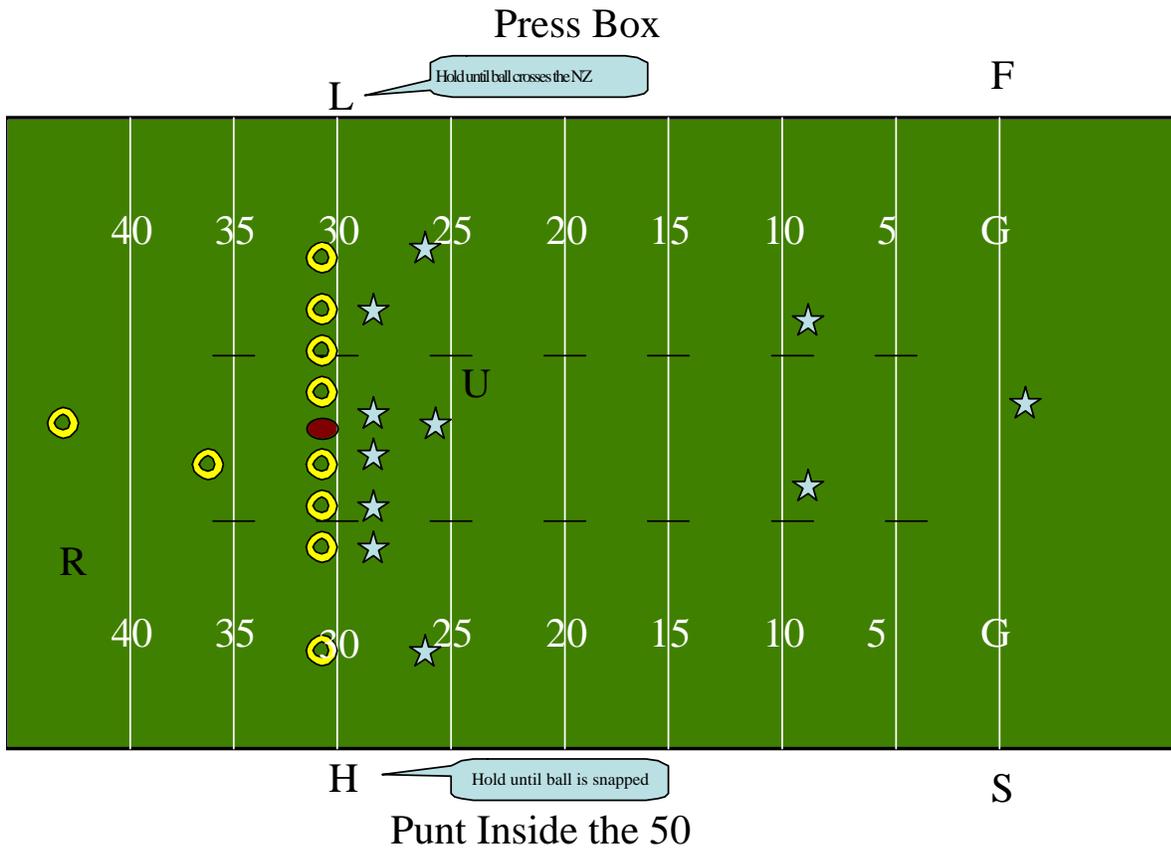

ARTICLE 2. PUNT FROM INSIDE THE 50-YARD LINE

A. Positioning.

1. **Referee, Umpire, Line Judge, and Head Linesman** will assume their normal positions.
2. The **Field Judge, Side Judge** will position themselves at the goal line.

B. Coverage.

1. **All Officials** will officiate using normal mechanics
2. **Side Judge, and Field Judge** will officiate using normal mechanics, paying particular attention to goal line coverage. They should remain at the goal line until player possession and the goal line is no longer an immediate issue.

Section 11: One Point Trys and Field Goals

ARTICLE 1. POSITIONS AND MECHANICS

The positions listed below should be taken during Trys and Field Goal attempts. **All Officials** should be aware of game situations and be prepared to quickly move to their respective positions for Field Goal attempts.

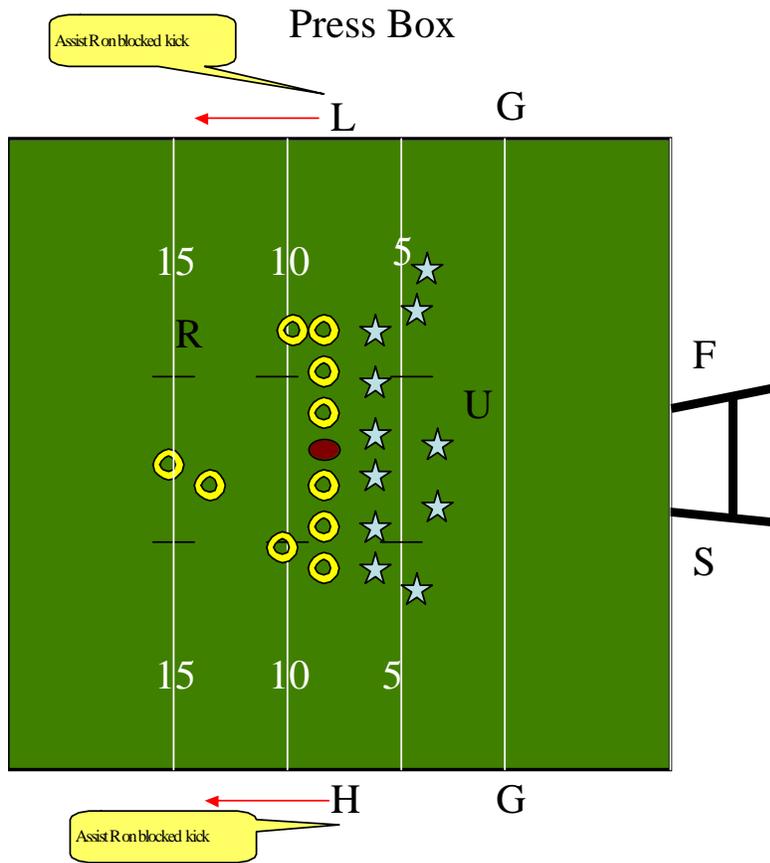

- A. The **Referee** is positioned at approximately the same yard line as the kicker and wider than the normal tight end position. Observe snap to the holder and observe legality of the hold. Be ready to officiate either a run or pass. Observe action on kicker and holder after the kick is away. Verbalize the kick is “gone”. Once all action has ceased in the vicinity of the kicker check with deep officials for score/no score. Ensure there are no penalties then repeat deep official’s “good” or “no good” signal. Do not echo any sweeping motion signals.
- B. The **Umpire** has primary responsibility for the legality of the snap and illegal contact on the center. He will observe offensive blocking and watch for a “pull and shoot” technique by Team B. He should also be aware of Team B “leaping” fouls.
- C. The **Line Judge** and **Head Linesman** will hold their normal positions until the kick has crossed the Line of Scrimmage. They may then move downfield if subsequent action requires their attention i.e. the kick is short of the goal line. They have primary responsibility for the sideline all the way to the endline.
- D. The **Field Judge** and **Side Judge** are positioned on the endline under their respective goal post uprights. Once the ball is kicked they may adjust slightly to ensure accuracy of the call. The **Field Judge** rules if the ball hits the crossbar and he blows the whistle. Signals for the covering officials are:
 1. The official nearest the ball will rule on status of kick (good or no good). He will sound his whistle and verbally communicate to the other official whether the kick was good or no good.
 2. If the ball is clearly short or clearly wide the only signal required is the “no good” signal (arms waved three times at chest level) by both officials. If the ball passes just outside of the uprights both official should give the “no good” signal, which stops the clock, if necessary, and the covering official may give a sweeping motion of the arms to indicate the kick was outside the uprights. Ensure the **Referee** has seen the signal.
 3. If the score is good both officials will give the signal and hold it until the **Referee** has acknowledged the signal.
- E. If the Try or Field Goal attempt breaks down and a scrimmage play develops the following mechanics will be used:
 1. The **Referee** will officiate action behind the neutral zone with help from the **Line Judge** and **Head Linesman**.

2. The **Umpire** will officiate from the inside out watching for illegal action at the point of attack..
3. The **Line Judge** and **Head Linesman** will officiate as any normal scrimmage down except they have primary responsibility for the sideline through the endline. They will also have goal line responsibility. They must be in position to rule on all goal line issues (touchback, ball entering the endzone, etc.)
4. The **Field Judge** and **Side Judge** share responsibility for the endline They will take a position that will allow him to help in officiating the play. They should not attempt to get to their respective sidelines. The **Line Judge** and **Head Linesman** have responsibility for the sideline.

One Point Trys and Field Goals

Section 12: Fumbles and Beanbag/Hat Mechanics

ARTICLE 1. FUMBLES

- A. When a covering official sees a fumble he will mark the yard line with his beanbag and continue to officiate.
- B. When a grounded player recovers a fumble, the covering official should stop the clock if appropriate and signal the direction if the defense recovers. It is not necessary to rush this signal. He should ensure he is cognizant of which team has recovered and in which direction the ball will next be put in play. If the offense recovers he should quickly raise his hand and signal the appropriate down. It is not necessary to point in a direction.
- C. If there is an immediate pileup but the official has seen a player in clear possession of a grounded fumble DO NOT wait for the players to un-pile before signaling possession.
- D. If there is a pile-up before clear possession can be determined the following procedure will be used:
 1. The covering official becomes the “designator digger”. He should aggressively find the ball in the pile – ensuring players not in possession are removed from the pile (he may be aided by other officials). Get to the ball and determine who has possession and announce it to the nearest official.
 2. The official next nearest the pile should signal “stop the clock” and other officials should echo the signal.
 3. Normally it should only require 2-3 officials actively involved with clearing the pile-up. The other officials should be “great dead ball officials”.
 4. Once possession has been determined that information should be relayed to the **Referee** and he will then wind the clock and signal the appropriate down if Team A is in possession. If Team B has gained possession the **Referee** will point in the appropriate direction. The digging officials should resist pointing in a direction as they may become disoriented while digging for the ball.

ARTICLE 2. BEANBAG/HAT

- A. Beanbags. **All Officials** will carry at two beanbags in their belt. Keep in a place where there is no confusion with the foul marker. Beanbags will be used in the following manner:
1. They will normally be dropped at the appropriate yard marker rather than thrown. Beanbags and hats designate yard lines rather than specific spots on the field.
 2. Beanbag ALL fumbles (irrespective of their location to the neutral zone). DO NOT beanbag a loose ball. See the fumble.
 3. Beanbag end of scrimmage kicks.
 4. Beanbag handoffs or backward passes beyond the neutral zone (or any time when there is no neutral zone).
 5. Beanbag all potential momentum exception spots.
 6. Beanbag illegal touching during Scrimmage Kicks (also illegal touching on Free kicks). Be aware there can be more than one spot of illegal touching. If illegal batting in Team B's endzone, be sure to drop the bean bag beyond B's goal line.
 7. Beanbag the location of the ball if an inadvertent whistle is sounded.
 8. It is NOT necessary to beanbag an interception – unless momentum rules apply.
 9. Only RARELY should the beanbag be used to mark the forward progress spot.
- B. Official's hat. On several occasions the official's hat is used to signify that a significant event has occurred. At the end of a down all officials should be aware of a potential sideline issue if they observe another official without his hat. In the following scenarios the official's hat will be tossed:
1. When an eligible receiver voluntarily goes out of bounds.
 2. When an eligible receiver fails to immediately return inbounds after being blocked out.
 3. When a Team A player goes out of bounds during a Free or Scrimmage Kick

Section 13: Timeouts

ARTICLE 1. PROCEDURES FOR CALLING TIMEOUT

All Officials. Be alert for another official, player, substitute or Head Coach requesting timeout.

All Officials should know the number of team timeouts throughout the game. **DO NOT** grant a team a timeout they have no timeouts left. If the team has a timeout left, immediately signal the game clock to stop and ask the head coach if it is to be a “full” or “30-second” timeout. Other officials should immediately echo the time out signal. Notify the **Referee** and then document who called the timeout and the number of team timeouts remaining. The **Referee** will then give the “Stop the Clock” signal and point in the direction of the team calling the timeout (also the 30-second timeout signal if appropriate). All officials should record the calling player’s number, time remaining in the quarter, and confirm how many time outs each time has remaining. If this is an official’s timeout (measurement, injured player, etc.) the **Referee** will indicate by tapping his chest with two hands. All officials should then record timeout data on their game card.

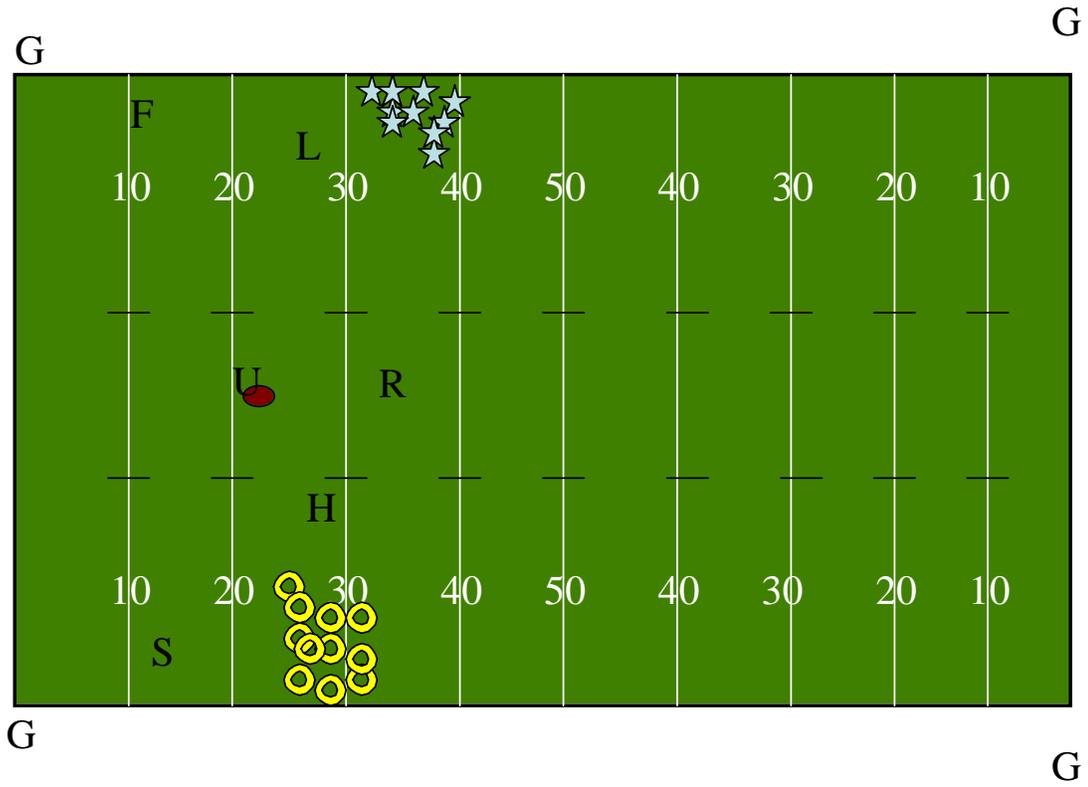

ARTICLE 2. DURING TEAM TIMEOUTS

- A. For team’s final timeout of the half: after completing the initial timeout signal the **Referee** will face the Press Box and give the “incomplete pass” signal three times and “chuck” his arms at waist level in the direction of the appropriate team. If the **Referee** is “miked” he will verbalize that the team has used their final timeout of the half.
- B. The **Umpire** will remain with the ball and communicate calling team and number of timeouts remaining for both teams.
- C. The Field Judge will time the time out.
- D. Depending on ball position, either the wing official (**Head Linesman/Line Judge**) or deep official (**Side Judge/Field Judge**) should position themselves in the vicinity of the team area and notify the appropriate coach of the number of timeouts remaining in the half. If this is the final timeout of the half ensure the head coach is notified and receive his acknowledgement.
- E. When the **Referee** is notified by the **Field Judge** of the 50-second mark, he will communicate (verbally and with hand signals) with the other officials that he is about to mark the ball Ready for Play. **All Officials** should avoid using the whistle to communicate during timeouts. This could lead to confusion regarding the initiation of the 25-second count. The **Referee** will then begin the 25-second count after 65 seconds have elapsed in the timeout interval. If both teams are ready for play before 65 seconds have elapsed the **Referee** will confirm with both Team Captains they are ready for play and then give the Ready for Play signal.

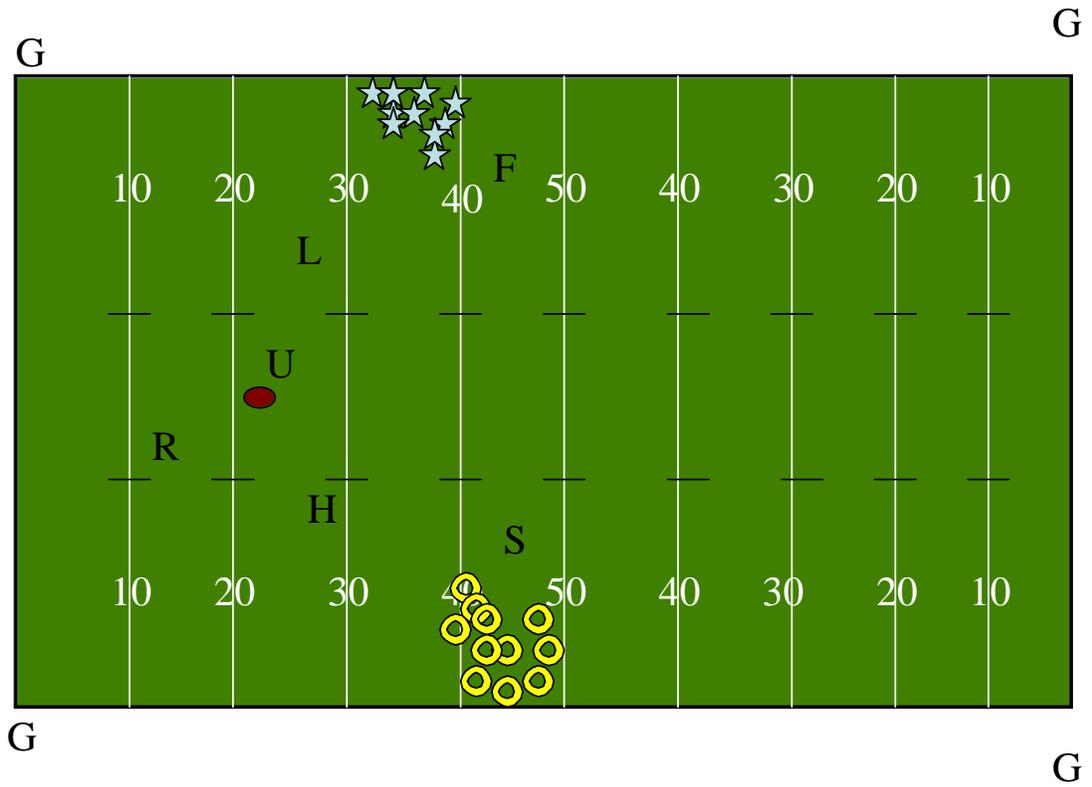

Timeout Positions

Press Box

Press Box

Section 14: Measurements

ARTICLE 1: POSITIONS

- A. **Referee** will stand near the forward stake and ball.
- B. **Umpire** will take the forward stake from the chain crew before it reaches the vicinity of the ball.
- C. **Head Linesman** will bring the clip in from the sideline to the point indicated by the **Line Judge**.
- D. **Line Judge** will be at the 90-degree inbounds mark nearest the rear stake.
- E. After dropping a bean bag at the nose of the ball, the **Field Judge** will hold the ball stationary throughout the measurement. While holding the ball, the **Field Judge** will position himself beyond the forward stake and on the pressbox-side of the ball.
- F. **Side Judge** will move the down box to the location of the forward stake.

ARTICLE 2: PROCEDURES

- A. At the end of a down each official must be aware of the line to gain and if appropriate verbally warn crew (“close, close”). The ball should then be placed at the downfield foot of the covering official. If the **Referee** determines a measurement is required he will stop the clock. The **Head Linesman** will go to the sideline to get the chain at the clip. The down marker will be placed at forward stake prior to moving the chains. When the chain is at the 90 degree point marked by the **Line Judge** the **Head Linesman** will place the clip on the rear-most part of the line and the **Line judge** will place his foot behind the clip on the chain and the **Head Linesman** will announce “ready”. The **Umpire** will then pull the chain taut and place it on the ground next to the ball. The **Referee** will ensure the chain has no kinks and is tight; and then make his determination.
- B. If the measurement indicates the ball is short of the line to gain outside of the inbounds line, the ball will remain on the ground and, if appropriate, the **Referee** will carry a new ball with the forward progress spot marked on the chain to the inbounds spot marked by the **Line Judge**. Again, the **Referee** will ensure chain is tight and place the ball at the forward progress marked on the chain. Keep the ball on the outside of the ball so it is not dragged across the ball when returning to the sideline. If the measurement occurs inside the inbounds line, the ball will remain where it is.

Section 15: End of Period, Half Time and Extra Periods

ARTICLE 1: END OF PERIOD

As the period nears an end **All Officials** will be aware of the game clock. **The Side Judge** has primary responsibility for termination of the period. If the ball is dead he will sound his whistle when the game clock reaches “00”. Upon the game clock reaching “00”, the **Referee** will ensure all action has ceased and there are no fouls nor any requirement to extend the period exists (delay of game in scrimmage kick formation or an accepted penalty). He will then signal termination of the period by holding the ball above his head.

- A. If it is the end of the 1st or 3rd period, the **Referee, Umpire and Head Linesman** will then meet at the at the dead ball spot and record down, distance, field location and yard line on their game cards. After all agree the **Umpire** will take possession of the ball and he and the **Referee** will jog to the succeeding spot for the next period. The **Head Linesman** will proceed to the sideline and move his chain crew to the appropriate location to begin the next period. The **Side Judge** will move direct the movement of the down box to the succeeding spot. The **Line Judge** will note the location of the ball and move to the opposite end of the field and ensure the down box and chains are properly set. The **Side Judge and Field Judge** will monitor team activity and (if appropriate) alert teams when notified by the **Field Judge**. The **Field Judge** will time the interval and notify other officials when 45 seconds has expired .
- B. At the end of the half the **Referee** will give the appropriate signal and “wind the clock” to begin Halftime. The **Sided Judge** will time the halftime interval for the officials. The **Referee** need not wait for all players and coaches to clear the field to begin the timing. The **Field Judge** will gather the game balls and take them to the lockerroom. **Other officials** should ensure separation of teams as they exit the field. If both teams are exiting in the same area keep the home team on their sideline until the visiting team has exited the field.

ARTICLE 2. HALFTIME.

All Officials will return to the official’s locker room. The **Field Judge** should ensure the game balls are returned to the official’s locker room. During intermission officials should ensure they re-hydrate, discuss any unusual plays or problems that arose during the first half. Quickly review Extra Period procedures and begin the completion of the NCAA foul report if time permits. The officiating crew will leave the locker room in sufficient time to be on the field no later than 5 minutes before the expiration of Halftime.

The **Line Judge, Field Judge, Side Judge and Head Linesman** may go directly to the team locker rooms to ensure the captains are on the field three minutes prior t the beginning of the Second Half and teams are on the field in time to begin the Second Half on time.

ARTICLE 3. EXTRA PERIODS

When all activity during regulation has ceased and the game is tied the game will continue with Extra Period(s). Teams will be instructed to go to their respective sidelines. The officiating crew will meet in the center of the field to review procedures (also should be reviewed during Halftime).

- A. Standard coin toss procedures will be used except the options for the captains will be per Rule 3. Indicate winning Captain by placing hand on Captains shoulder. After positioning the Captains in the direction they will be going the **Referee** will give the first down signal in the direction the offensive team will be going. **Sideline Officials** may review Extra Period procedures with the Head Coach if requested.
- B. If additional Extra Periods are required the procedure will be repeated – except there is no coin toss. The first option will alternate between each team for each new period. It is important to document each period and score to keep track of the team options for subsequent Extra Periods.

Section 16: Post Game Duties

ARTICLE 1. FIELD DEPARTURE

At the expiration of the game the officials should note the official time and depart the field together. They should not delay unnecessarily on the field nor should it appear as if they are “running from the scene of a crime”. Remember to obtain the game balls, NCAA foul report (if kept by a sideline individual) and chain crew equipment. Do not seek nor avoid communication with players/coaches. Keep any conversations very short and then depart the field together. ECAC assigned **Game Clock Operators** must go to the official’s locker room as soon as their timing duties are complete. If there are Extra Periods the **Game Clock Operator** will remain in the Press Box until the game is over.

ARTICLE 2. LOCKER ROOM

Once in the locker room be aware of other personnel in the area and avoid discussing any controversial plays until you are sure any conversation will be for the “crews ears only”. Complete all game paperwork (NCAA foul report and ECAC ejection report if necessary) prior to showering. If there is an assigned ECAC **Game Clock Operator** he will deliver copies of the NCAA Foul Report to each Head Coach. If the Head Coach is unavailable find an assistant coach get his name and give him the report.

ARTICLE 3. OFFICIAL’S DEPARTURE

Once officials have completed their duties they should depart the game site. Officials may revert to golf shirts or other casual (collared shirts and slacks) when leaving the game site. **Absolutely no alcoholic beverages** will be consumed at the game site or anywhere on campus. Officials are prohibited from participating in any hospitality event. Make no comments to media. Refer media questions to the ECAC Supervisor of Football Officials.

ARTICLE 4. POST-GAME REPORTING

The **Referee** must submit an NCAA foul report and ECAC Ejection Report (if appropriate) to the Supervisor of Football Officials no later than the day following the game. The report may be emailed (**bward@ecac.org**), faxed (**508-771-9486**) or regular mail. Player ejection forms are found on the ECAC website

(<http://www.ecac.org/feature/feature.asp?section=officiating&id=1758>).

If there are any unusual circumstances that occur before/during/after the game the **Referee** must call the Supervisor of Football Officials immediately after the game. When in doubt **CALL!**

ATTACHMENT A

Game Clock and Play Clock Pre-game

Game Clock Operator

1. Synchronize timer's watch with the **Side Judge**.
2. Confirm **Game Clock Operator** has backup stopwatch.
3. **Clock Operator** will advise on-field officials of the location of his position in the Press Box.
4. Establish procedures for communications between the Press Box and the field.
5. Discuss appropriate signals for starting and stopping the clock. Review 2006 rule changes for starting the clock on awarding Team B first downs.
6. Review signals for starting the clock on Free Kicks (2006 Change)
7. Covering officials normally are responsible for stopping the clock at the end of a down so key him.
8. Once the play is dead any official may stop the clock. Be alert for clock stoppage due to fouls, timeouts, ball out of bounds, etc.
9. Review signals that would stop the clock. (incomplete pass and scoring signals)
10. Review "pile-up" procedures. If clock was stopped be alert for **Referee** starting the clock once offensive team possession has been determined.
11. If the play clock is started in error the game clock WILL NOT be stopped.
12. Review game clock failure procedures.
 - a. **Game Clock Operator** will immediately pick up timing using his back-up watch. When the play is over, immediately get the field officials attention and relay the correct time to the **Side Judge**.
 - b. If possible have P. A. announcer notify crowd the stadium clock has malfunctioned and the official game time will be kept on the field.
 - c. If possible, the **Side Judge** will communicate the correct game time to the P.A. announcer as time and duties permit

ATTACHMENT B

Sample Pre-game Checklist

The following outline is a very basic outline of areas to be covered during the official's pre-game conference. **Referees** will expand, modify and adjust those topics covered predicated on the crew composition and the game to be officiated. Irrespective of the outline used, the **Referee** must guide the conference so that it is interactive and all officials participate.

PRE-GAME DUTIES

1. Check correct time and review schedules and timing issues
2. Review coach's visit
3. Review on-field duties and timing
4. Obtain team captains if game program is available

COIN TOSS

1. Review who gets team captains and teams - and when
2. Review procedures for escorting captains for coin toss
3. Discuss pre-toss procedures
4. Review second half procedures

FREE KICKS

1. Review "sweep" procedures
2. Identify pre-kick positions and signals
3. Cover restraining line rules
4. Discuss kick coverage
 - a. Goal line
 - b. Momentum
 - c. Touchback
 - d. Signals
 - e. Illegal blocks
 - f. Kicks out of bounds
 - g. Fair Catch
 - h. Kick catch Interference
 - i. Legal/illegal touching
 - j. Onside kicks
 - k. New 2006 clock procedures

SCRIMMAGE PLAYS – PRE-SNAP

1. Pre-snap positions
2. Player count/substitutions and communication
3. Offensive team requirements
4. Wing officials communications
5. Eligible receiver requirements
6. Motion man coverage
7. Fouls requiring “shut down”

SCRIMMAGE PLAYS – RUNS

1. Coverage of runner in the backfield/past LOS
2. Blocking in front of and behind runner
3. Holding fouls (when, where, and how). Review ECAC philosophy on holding
4. Forward progress (soft spots/behind the line etc.)
5. Fumble procedures and rules
6. Goal line coverage

SCRIMMAGE PLAYS – PASSING

1. Protection of passer
2. Coverage of and mechanics for passes near the NZ
3. Forward or backward pass rulings and mechanics
4. Intentional grounding issues/mechanics
5. Keys and zones
6. Ineligibles downfield
7. Short passes over the middle
8. Pass Interference rules and philosophy
9. Momentum issues near goal line
10. Complete or incomplete rules

PUNTS

1. Positions
2. Contact with kicker/snapper rules
3. Behind/beyond the NZ rules and mechanics
4. Kick catch Interference rules
5. Fair Catch issues
6. Illegal/legal touching
7. Untouched into end zone

8. Out of bounds mechanics and rules
9. Runback coverage
10. PSK rules
11. Fake kicks

FIELD GOALS AND TRYS

1. Positions
2. Goal post coverage
3. Illegal contact on kicker/holder/snapper
4. Fake kick coverage
5. Whistles

GENERAL MECHANICS

1. Fumbles/beanbags/hats
2. Pileups
3. Measurements
4. Officials Timeout
5. Coaches conferences
6. Ball rotation
7. End of quarter/half procedures
8. Recording fouls

CALLING FOULS

1. Holding
2. Covering “crack back” blocks
3. Player safety
4. Impact on play
5. Reporting to Referee
6. Reporting to the Head Coach
7. Enforcement procedures/mechanics

REVIEW NEW RULES

**REVIEW PROCEDURES IF AN OFFICIAL IS HURT AND UNABLE TO CONTINUE.
COVER WHO WILL ASSUME REFEREE RESPONSIBILITIES.**

ATTACHMENT C

Instructions for Ball Personnel

1. Ideal number is 4 ball persons. There should be two on each side, one on the Line of Scrimmage and one 10 yards downfield. They should remain at least 2 yards off the field of play during the down.
2. A new ball will be used when play ends on or outside the numbers. If the play ends out of bounds any ball will be used to spot at the sideline until the new team ball is relayed and spotted by the Umpire.
3. At the end of the play ball personnel come to the sideline.
4. A ball person will retrieve all balls out of bounds and on long passes away from the players.
5. On all kicks and changes of possessions, the new team ball will come in from the Press Box side (FJ/LJ)
6. For a Field Goal or PAT have a new ball on the ground behind the goal post. This will be the team ball for the kicking team. It will be relayed to the Field Judge for delivery to the Umpire.
7. Keep at least one ball of each team on both sides of the field. Officials will shuttle extra footballs to the opposite side without distraction. **NO LONG PASSES.**
8. Ball personnel should stay away from players if possible. Do not converse with players.
9. Collect balls in ball bag at half time and give to official (Field Judge).
- 10.** Keep alert and pay attention to the field. If play comes toward the sideline clear the area before the ball/runner gets there.

ATTACHMENT D
(To Be Inserted at a later Date)

ATTACHMENT E

Rushed Substitutions

Rule 3, Section 5, Article 2-e. Once the ball has been made Ready For Play, Team A is prohibited from making last second substitutions in order to place Team B at a disadvantage. The following mechanics will be used to ensure Team B is given an opportunity to “match-up” with late Team A substitutions. These procedures apply only when Team A makes a substitution. They do not apply to a “hurry-up” offense when no substitutions are made.

- A. When the **Umpire** recognizes a “rushed” substitution by Team A he will move to take a position over the ball to prevent Team A from snapping the ball.
- B. If other officials recognize a “rushed” substitution they will communicate with the **Umpire** to take a position over the ball.
- C. After assuming his position on the ball the **Umpire** will prevent Team A from snapping the ball until Team B has had an opportunity to react to the late substitution (normally 3 seconds).
- D. The **Referee** with help from the other officials will monitor Team B substitutions (if any). The **Field Judge** or **Side Judge** (as appropriate) may signal the **Referee** that Team B has completed its substitution. Team B must react promptly.
- E. When Team B has completed its substitutions the **Referee** will wave the **Umpire** off the ball. The **Umpire** will inform the Team A center not to snap the ball until he receives verbal approval from the **Umpire**. If the center snaps the ball before he is given verbal approval Team A will be assessed a Delay of Game foul.
- F. If the ball is then snapped prior to the expiration of the 25-second clock the play will be officiated using normal procedures.
- G. If the 25-second clock expires prior to the snap the officials will then determine whether Team B was given ample opportunity to react to the ‘rushed’ substitution.
- H. If Team B reacted promptly but the 25-second clock expired, Team A will be assessed a Delay of Game foul.
- I. If Team B delayed in their substitution then Team B will be assessed a Delay of Game foul.

Notes:

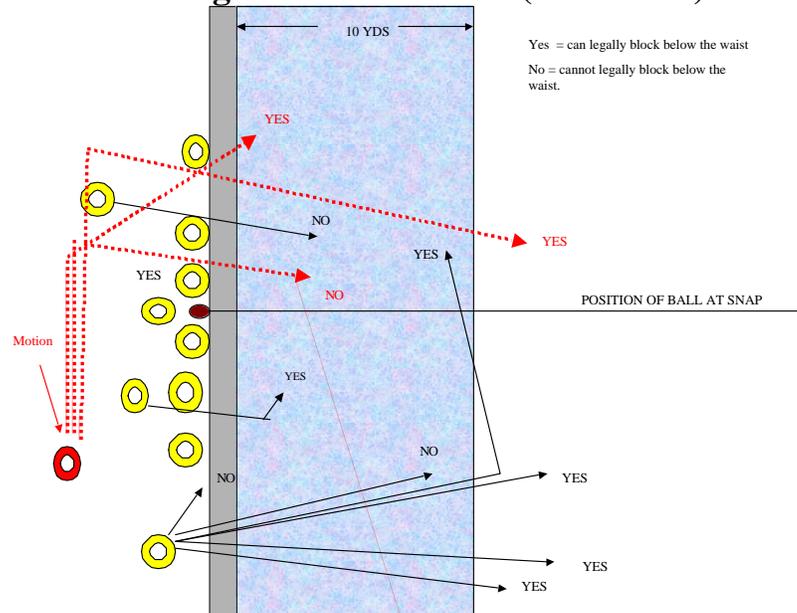

- Review Rule 3.5.2-e for penalties for subsequent infractions.
- If Team A is running a “no-huddle” offense and maintains a consistent pace throughout the game there is no need to employ the above mechanics. If,

- however, Team A begins to pick up their pace the officials must be aware of the potential for last minute substitutions used to place Team B at a disadvantage.
- Since the rule change (2005) teams have adjusted well to the new rule and are not employing this tactic as they had in the past. However, crews must be vigilant in being ready to employ the above mechanics. The procedures should be covered thoroughly in the pre-game conference.

ATTACHMENT F Blocking Below The Waist (Rule 9-2-e)

The Referee and Umpire are the best officials to determine initial location of backs who commit a block below the waist during the down. When a block below the waist foul is called it is imperative for the crew to communicate the initial location of the fouling player. This is a very difficult rule to officiate but a foul that must be caught because it is a dangerous foul for defensive players.
